## Reason for Hope

### West Virginia

- WV voted to officially withdraw from the ERIC system.
- The exposure in other states continues to lead citizens in WV to send those to our SoS and legislature.
- There is now a citizen push to eliminate the machines and move to paper ballots counted by hand.
- A solid group has been formed. We have members and the form for canvassing. We are now in the process of gathering a list of "risky" voters to start the process.
