Brief Background

State Voter Registration Database & ERIC Interaction

Voter Roll Growth vs Population Growth

Voter Roll Growth vs Population Growth All Counties

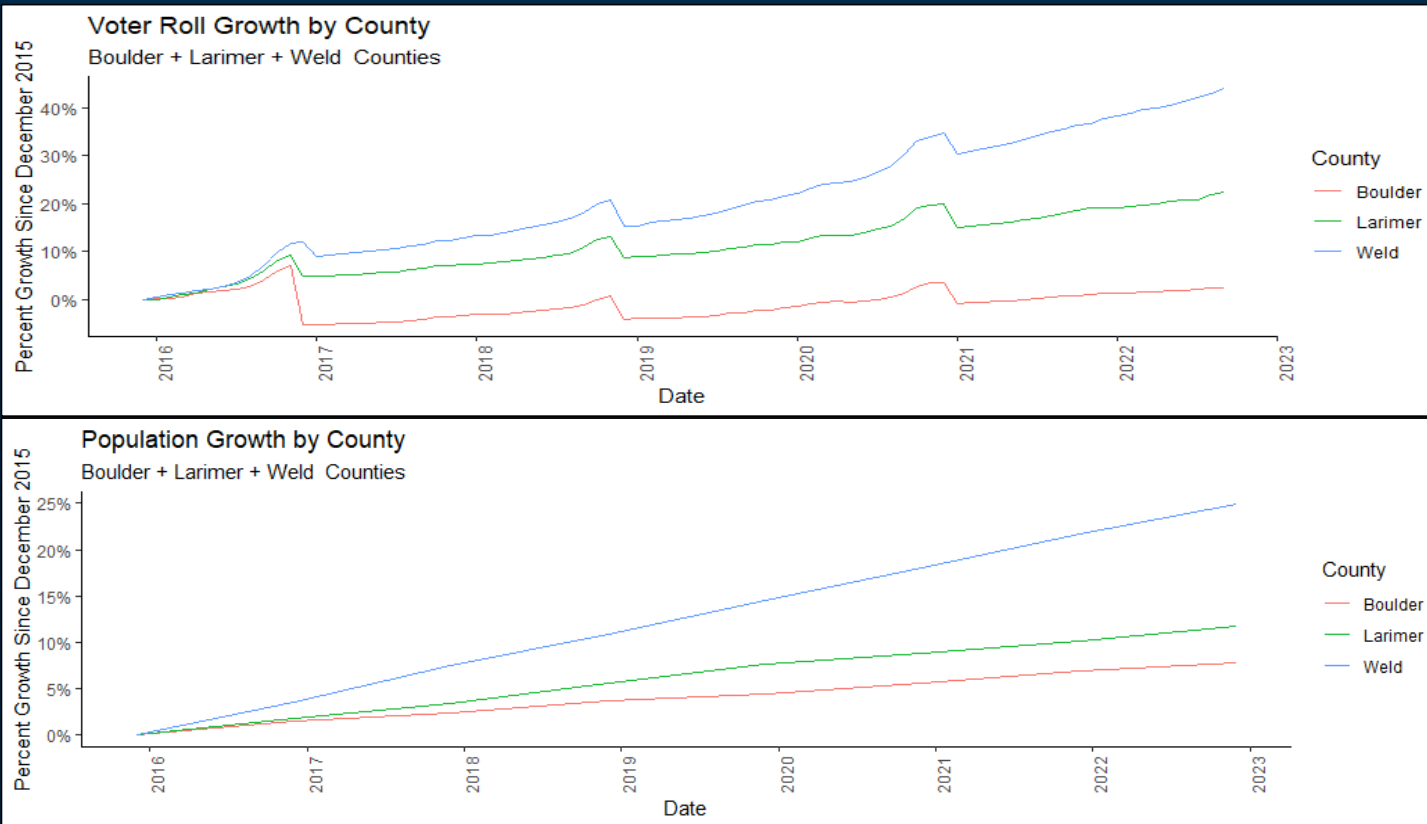

Key Takeaways

- Large increase in the voter rolls just prior to elections and large decreases right after. How many of the voters that were in the surge are also being removed immediately after?
- Removals only after general elections?
- Overall registration growth appears to be backed by the actual voting population growth (seen in the high correlation)

* County breakdowns can be found in the index

Voter Roll & Population Growth Comparison

All Counties

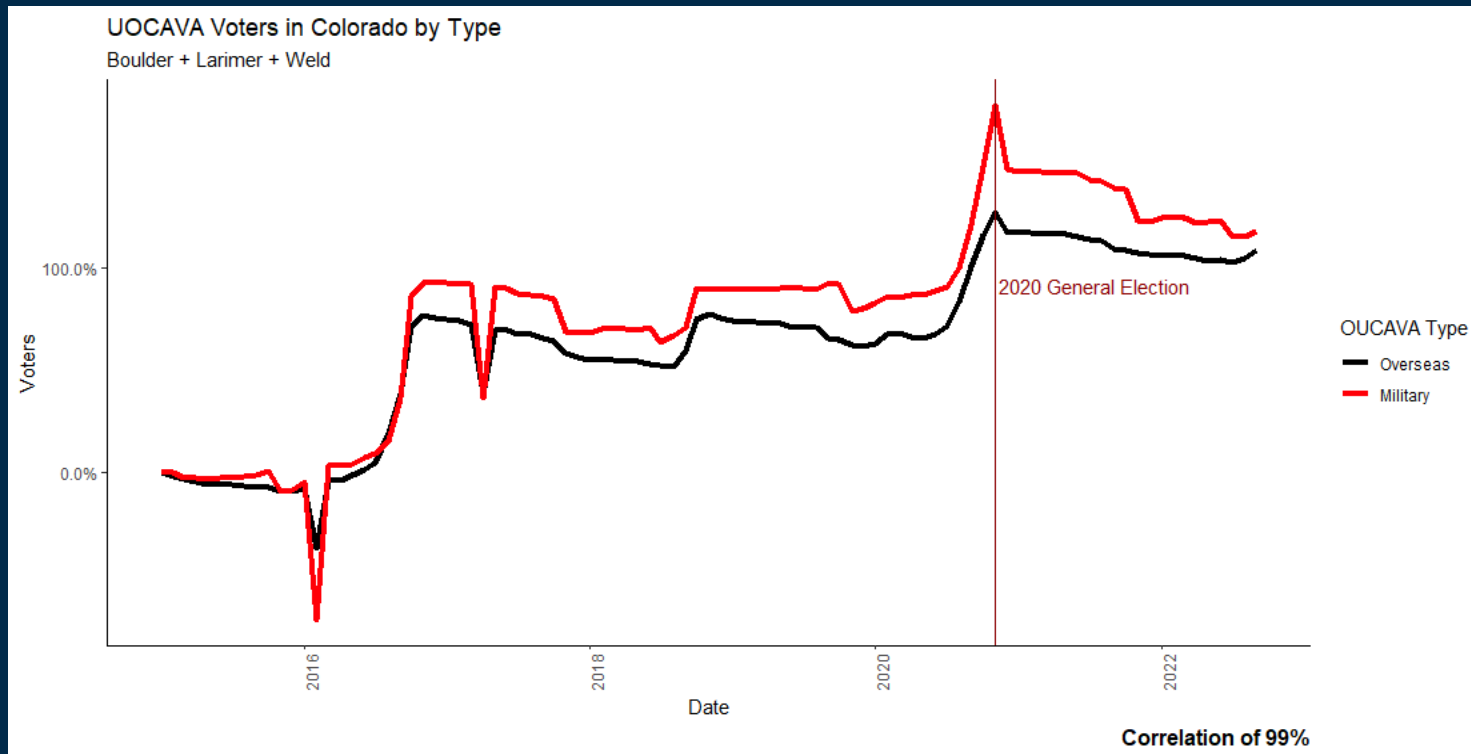

Key Takeaway

- Voter roll growth among the counties moved in concert with each other. Each county had different voting population growth, but saw the same pattern of growth and decline in the voter rolls

UOCAVA Voters

UOCAVA Voters

All Counties

Key Takeaways

- Substantial overseas voter decline in early 2016 that was built back up in time for the 2018 general election
- Substantial military & overseas voter growth right before the 2020 general election, but then removed after
- High correlation suggests that overseas voters may be cloned from military voters

* County breakdowns can be found in the index

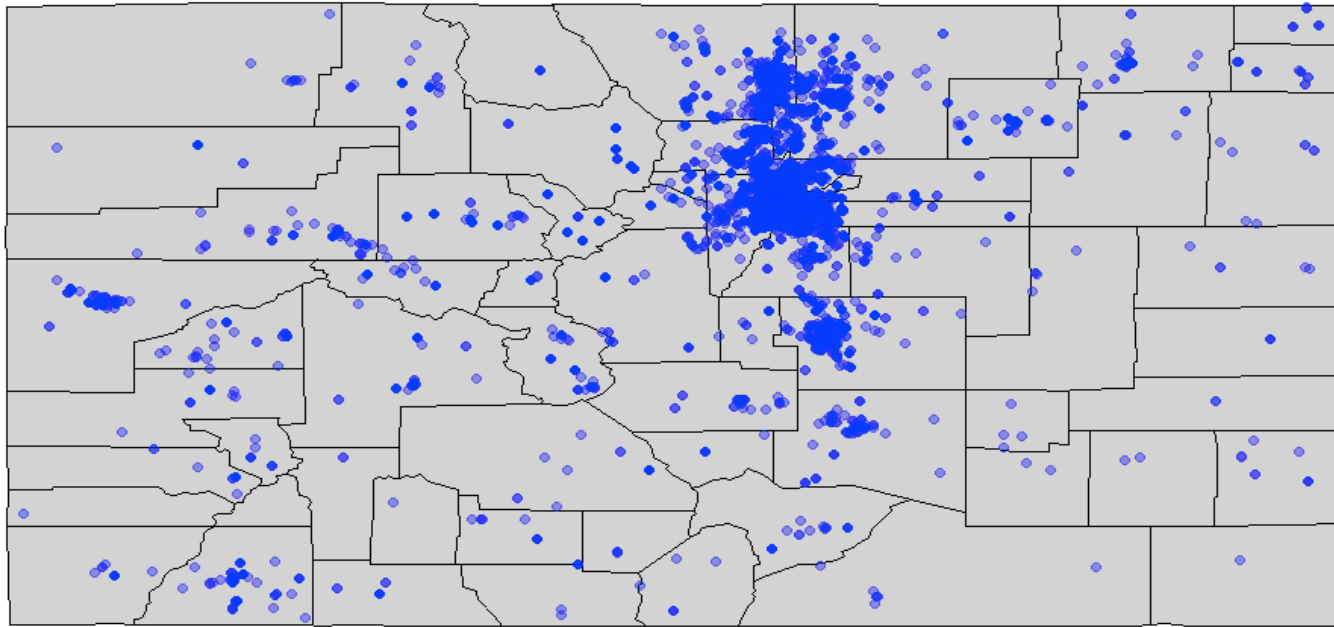

National Change of Address (NCOA)

Non-Military Voters – Intercounty Moves

All Counties (Active Voters)

New County Locations - Active & Inactive Voters

Voters Filed Permanent Change in Mailing Address but Still Registered in Boulder County

Key Takeaways

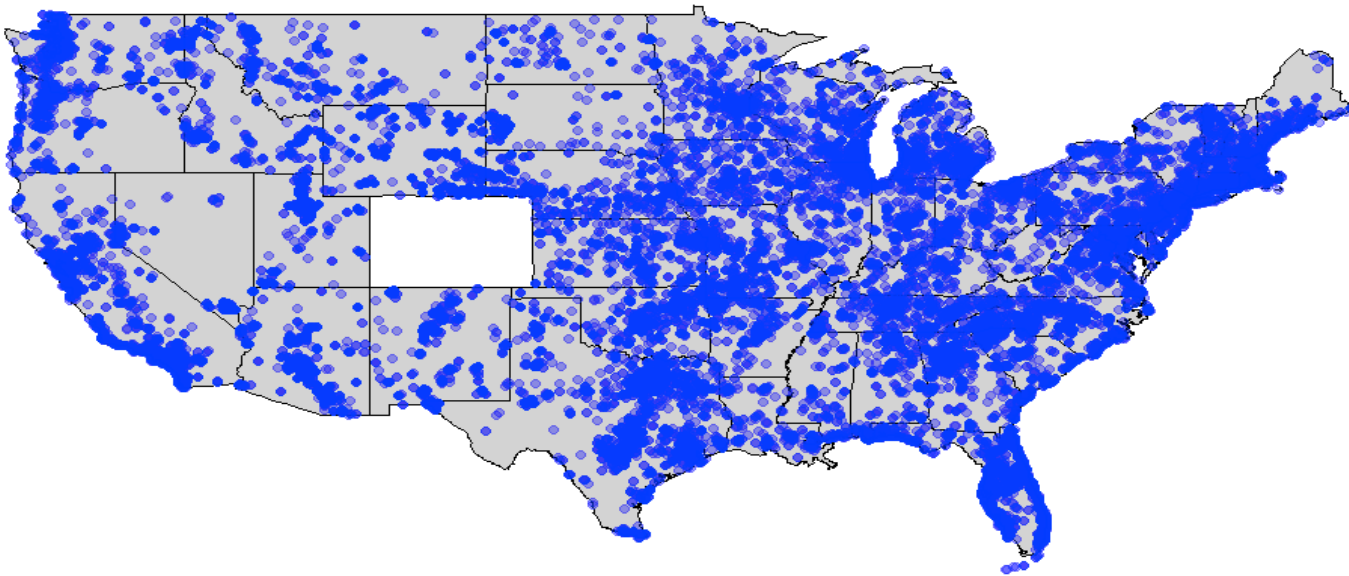

- 10,325 active and inactive voters who filed permanent changes of mailing address out of Boulder, Larimer, and Weld counties, but are still registered in their old county
- If someone files a permanent change of mailing address to another county, then they would have to pick up their mail daily in the other county. Safe to assume they moved to the new county

- As of the September 2022 Voter File
- County breakdowns available upon request

Non-Military Voters – Interstate Moves All Counties

New State Locations - Active & Inactive Voters

Voters Filed Permanent Change in Mailing Address but Still Registered in Boulder County

Map Does Not Show HI, AK, PR, GU, or VI, but Voters Do Reside There

Key Takeaways

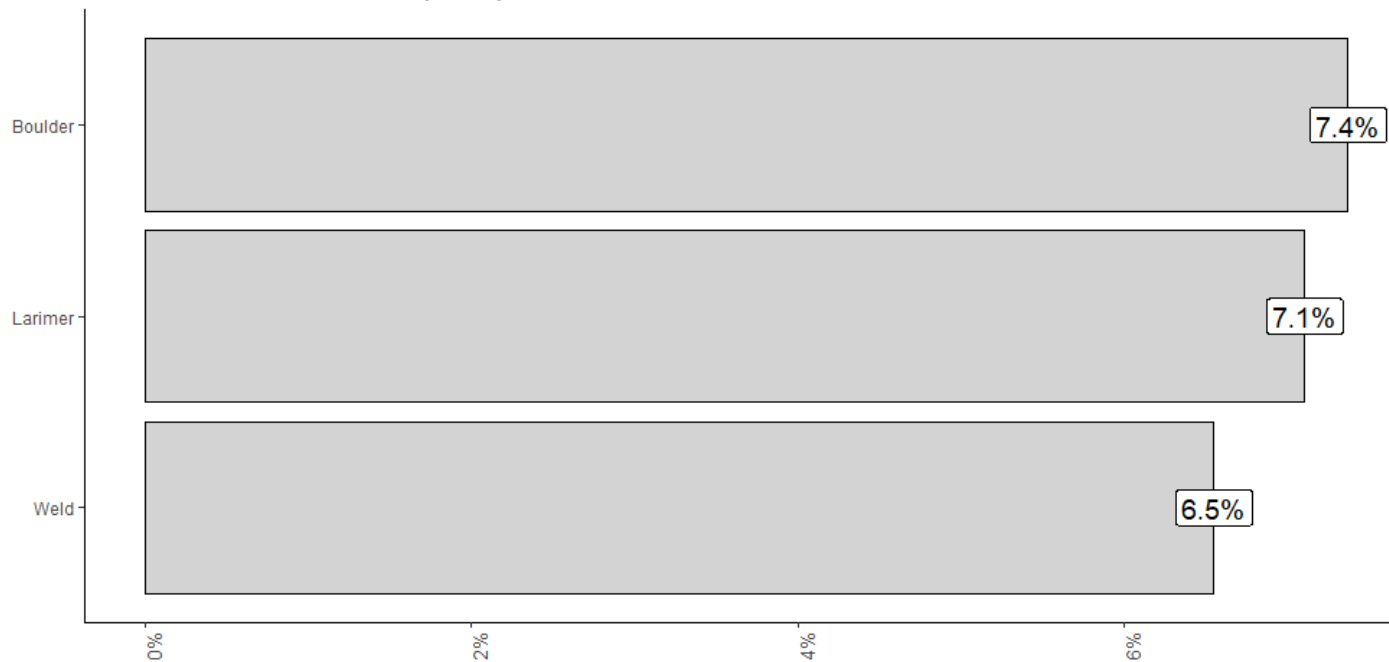

- 43,373 voters who filed permanent changes of mailing address out of Boulder, Larimer, and Weld counties, but are still registered in their old county
- If someone files a permanent change of mailing address to another state, then they would have to pick up their mail daily in the other state. Safe to assume they moved to the new county

- As of the September 2022 Voter File
- County breakdowns available upon request

Percent of Changed Mailing Addresses by County

Percent of Voter Rolls With Changed Mailing Addresses Out of County
Reflects Active and Inactive Voters by County

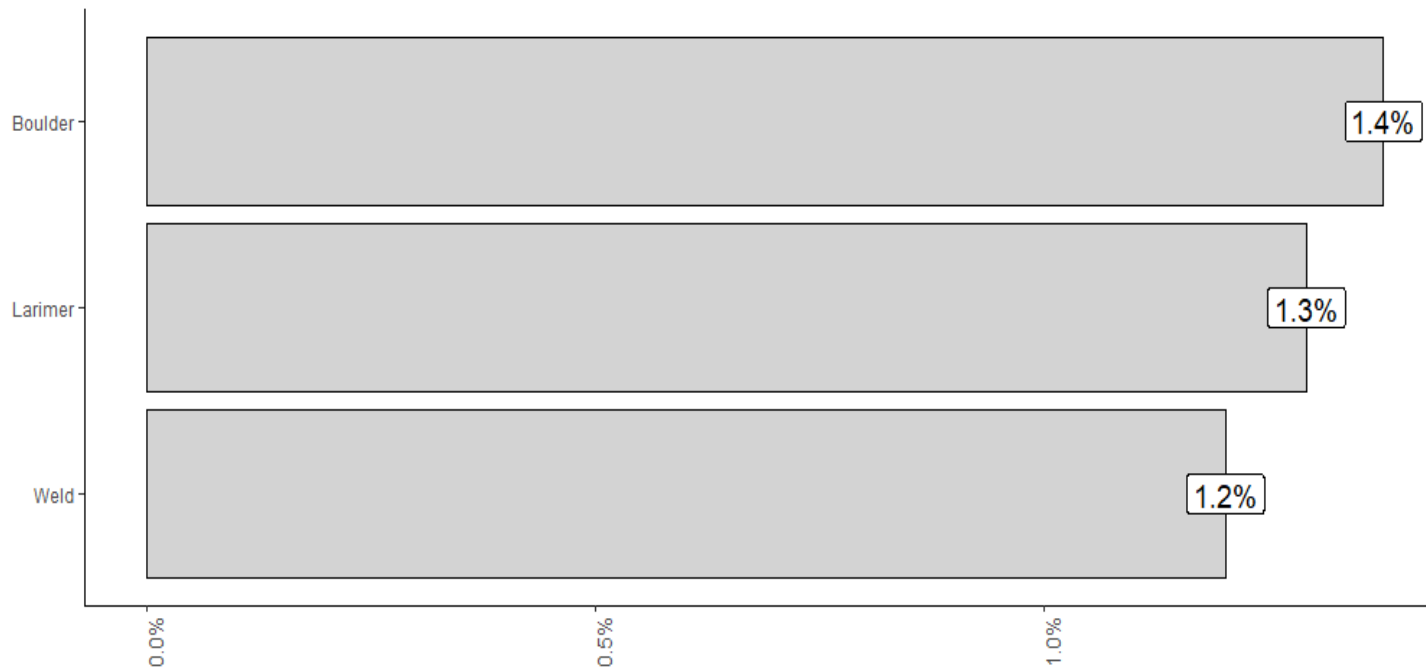

Key Takeaways

- Counties voter rolls include a between 6.5% and 7.4% of voters who had filed a permanent change in their mailing address out of the county of record

Percent of Moved Voters Registered in Two States

% Voters Registered in CO and Another State

Key Takeaways

- Every county has over 1% of their total voters registered in their county and another state

Inactive Voters Reactivated

Inactive Voters and Ballots

1. When clerks are notified of voters who move out of state or mail is returned undeliverable, they are marked inactive and won't receive a ballot
1. Although the above statement is true, clerks rely on getting NCOA data from the SoS (who gets it from ERIC). We have verified instances where clerks never received an NCOA notice for a voter, so they weren't marked inactive, and their address was not updated
2. Changing a voter status from inactive to active is relatively trivial thanks to the wonders of the internet (and the SoS page where you can do it online)

Reactivating Inactive Voters

- There are many checks and balances required to reactivate online. You need to know the personal information of voters to do so

Equifax data breach may affect nearly half the US population

Hackers steal sensitive personal information on as many as 143 million people from the credit reporting firm.

4 min read 

Equifax said Thursday that thieves stole customer names, Social Security numbers, birthdates and addresses in a hack that stretched from mid-May and July. The data taken affected as many as 143 million people.

Capital One Data Breach Impacts 106 Million Customers

The credit card issuer reveals hack impacting U.S. and Canadian customers

By CALEB SILVER Updated July 29, 2019

Info Needed for Reactivation

Name

Address

Birthdate

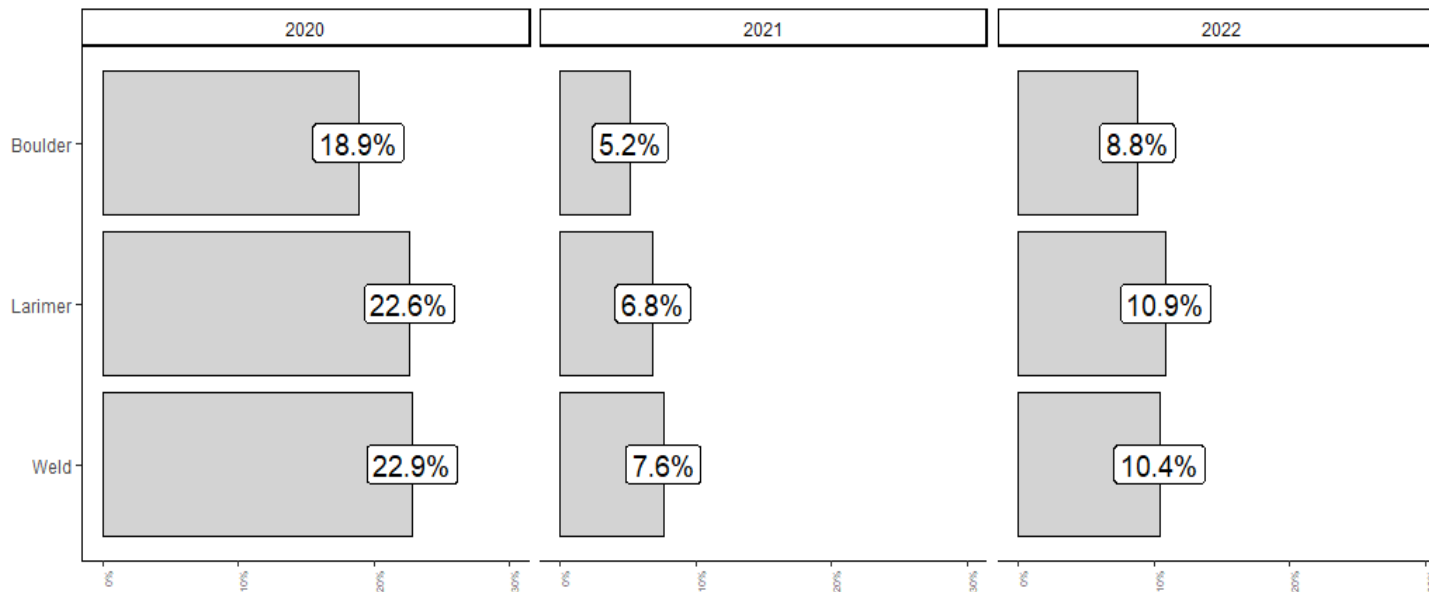

Social Security Number

Inactive Voters Reactivated

Percent of Voters Re-Activated by Year

As a % of Total Inactive

Key Takeaways

- 2020 saw many inactive voters reactivated in time for the general election
- Subsequent years have seen additional voters re-activated from the inactive pool creating a cumulative effect

Quick Recap

1. Counties had major insertions of voters right before general elections and major deletions immediately after. How many of the voters added to the rolls right before an election are subsequently removed right after the election?
2. Growth in overseas UOCAVA voters were highly correlated with military UOCAVA voters, suggesting a potential cloning of military voters
3. Over 53,000 voters filed a permanent change of their mailing address out of their county, but are still registered in their old county
 1. Upwards of almost 7.4% of certain counties rolls are filled with voters who have filed a permanent change of their mailing address out of their county of record
4. Counties have seen high numbers of their inactive voters reactivated, especially in 2020
 1. Given the ease of re-activating a registration online, recent data breaches could provide the means of reactivating voters as needed

Calls to Action

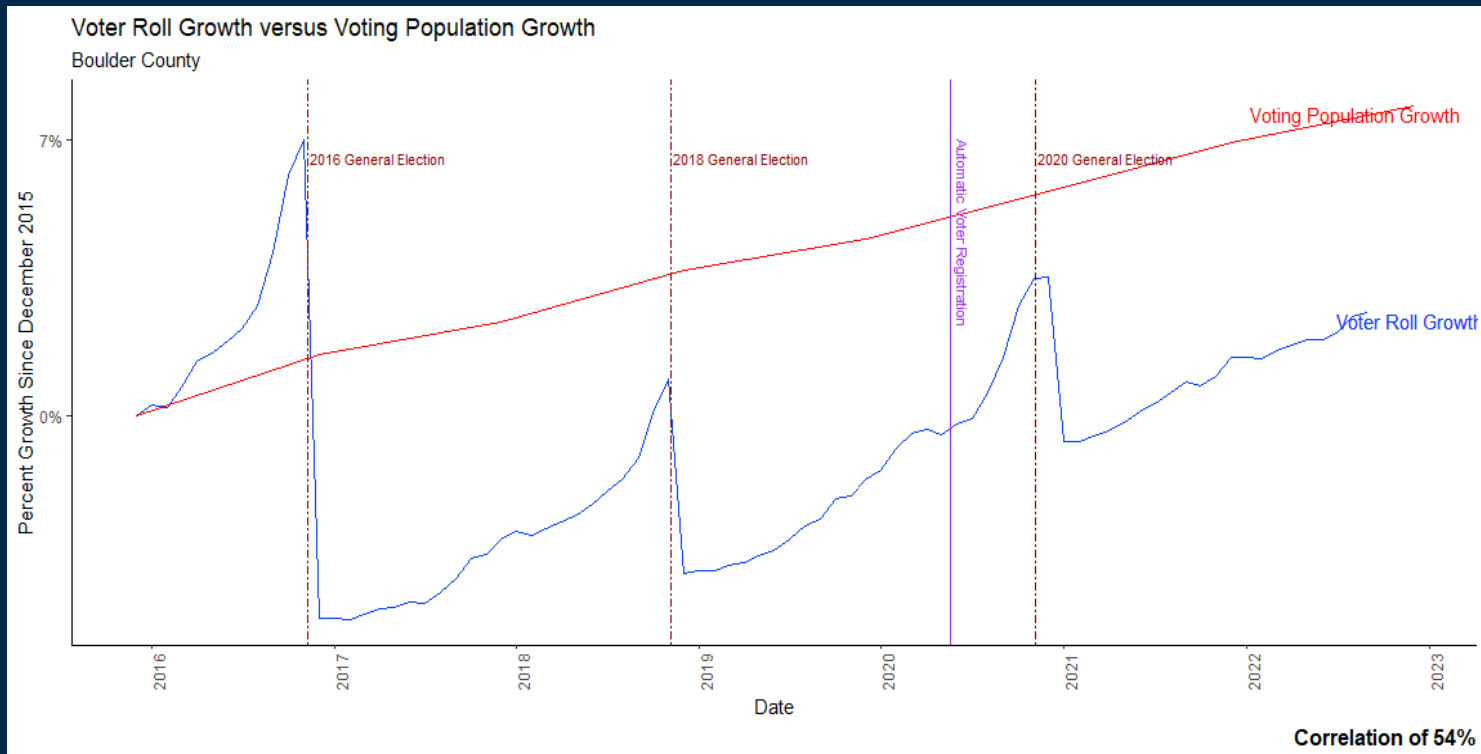

- Register today at causeofamerica.org and get connected with patriots in your state and county
- Remind friends and family to withdraw their registration if they have moved out of state.
 - For Colorado, they can do so here:
<https://www.sos.state.co.us/voter/pages/pub/withdrawLookup.xhtml>
 - Everyone else can look up their state here on the following webpages:
 - <https://www.eac.gov/voters/voter-registration-cancellations>
 - <https://www.voterreferencefoundation.com/>

Index

Voter Roll Growth vs Population Growth

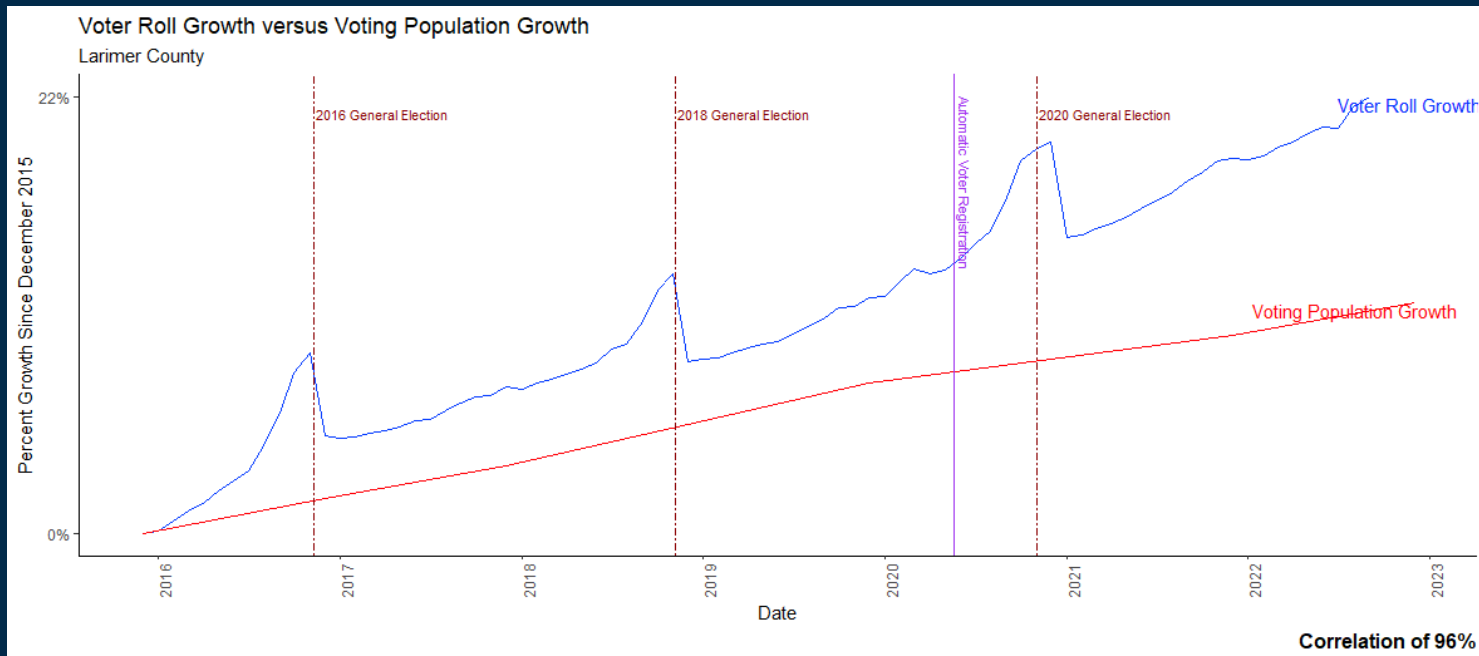

Voter Roll Growth vs Population Growth Boulder County

Key Takeaways

- Massive voter registration deletion after the 2016 general election
- Large insertions prior to each general election follow by a large purge immediately after

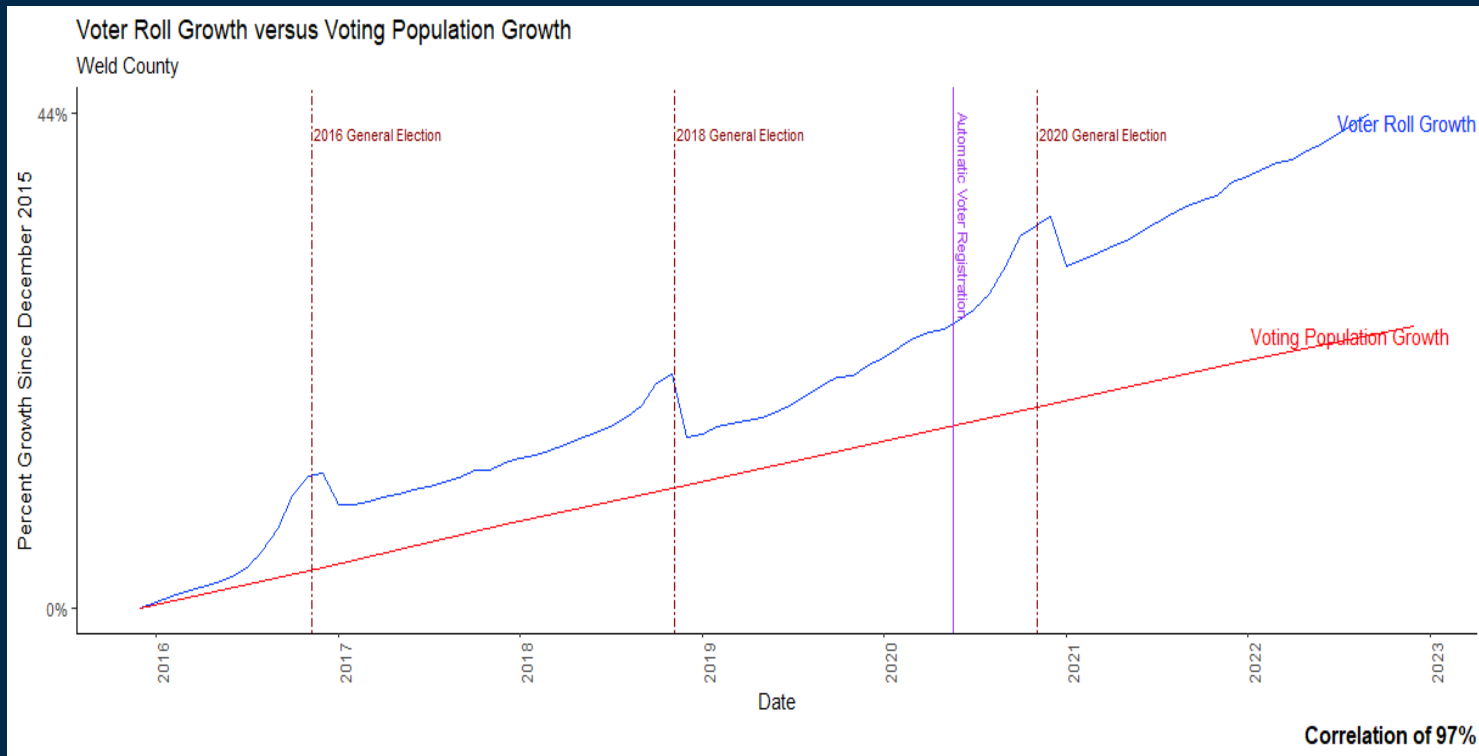

Voter Roll Growth vs Population Growth Larimer County

Key Takeaways

- Large insertions of voters prior to each general election follow by a large purge immediately after

Voter Roll Growth vs Population Growth Weld County

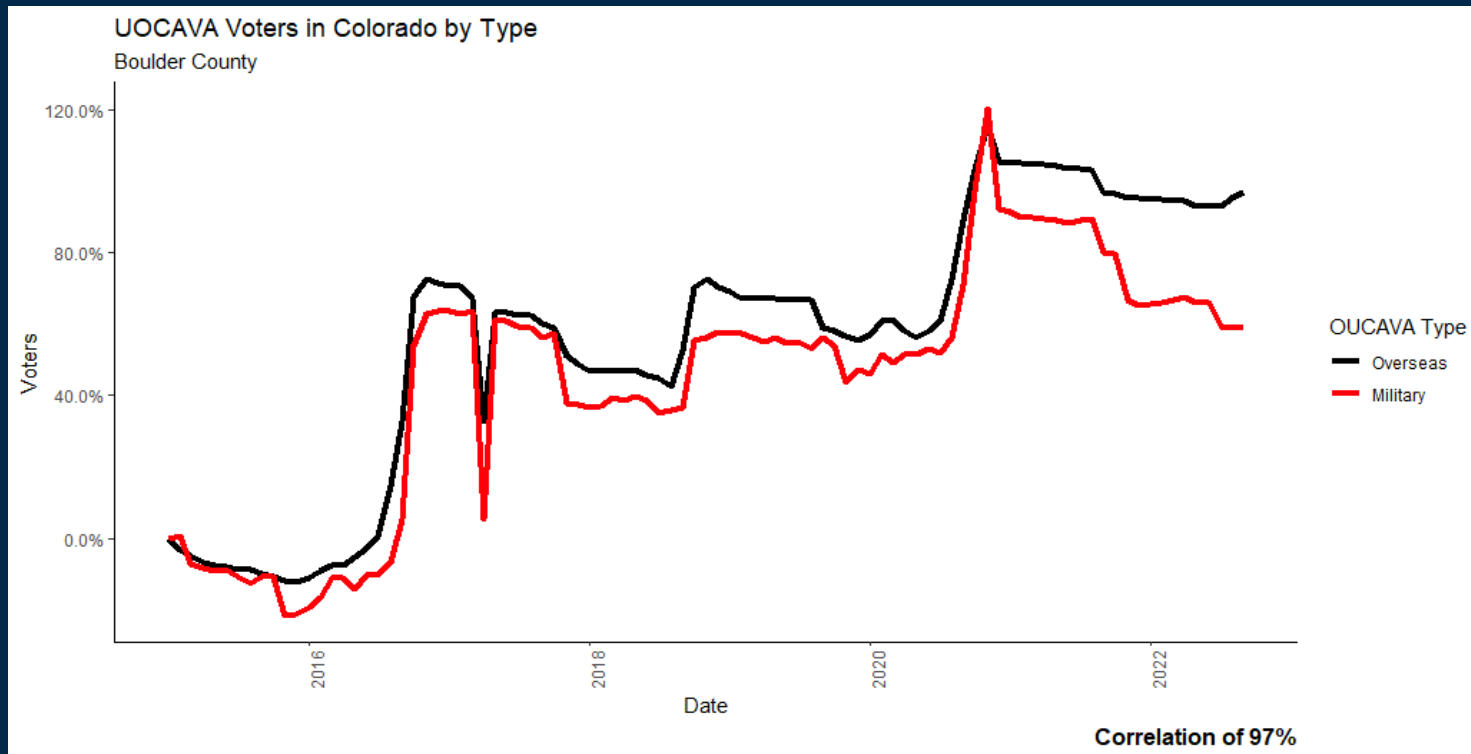

Key Takeaways

- Large insertions of voters prior to each general election follow by a large purge immediately after

UOCAVA by County

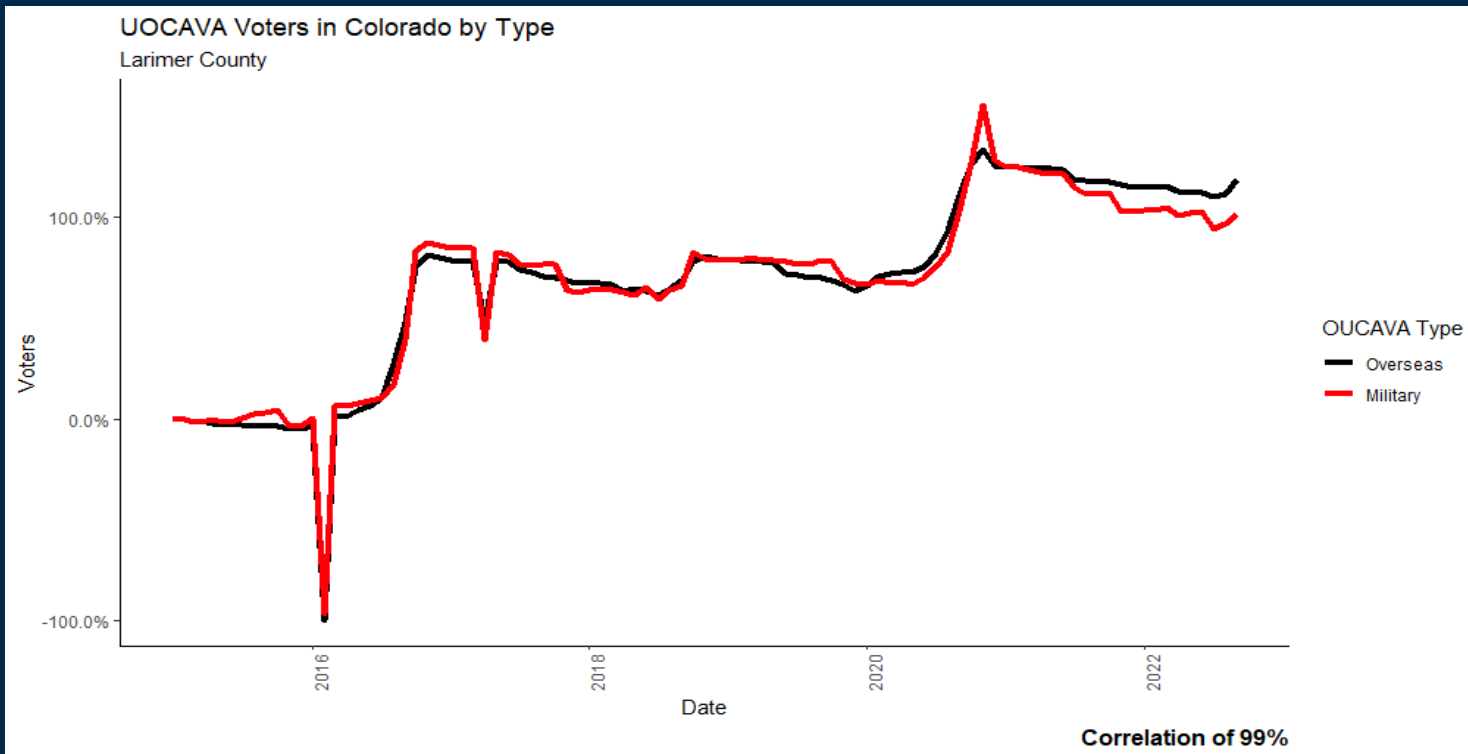

UOCAVA Voters Boulder County

Key Takeaways

- Large increase in military and overseas voters in 2016 (just in time for the general election)
- Major deletion of overseas and military voters in 2017, but then immediately added back
- Substantial military & overseas voter growth right before the 2020 general election, but then removed after
- High correlation suggests that overseas voters may be cloned from military voters

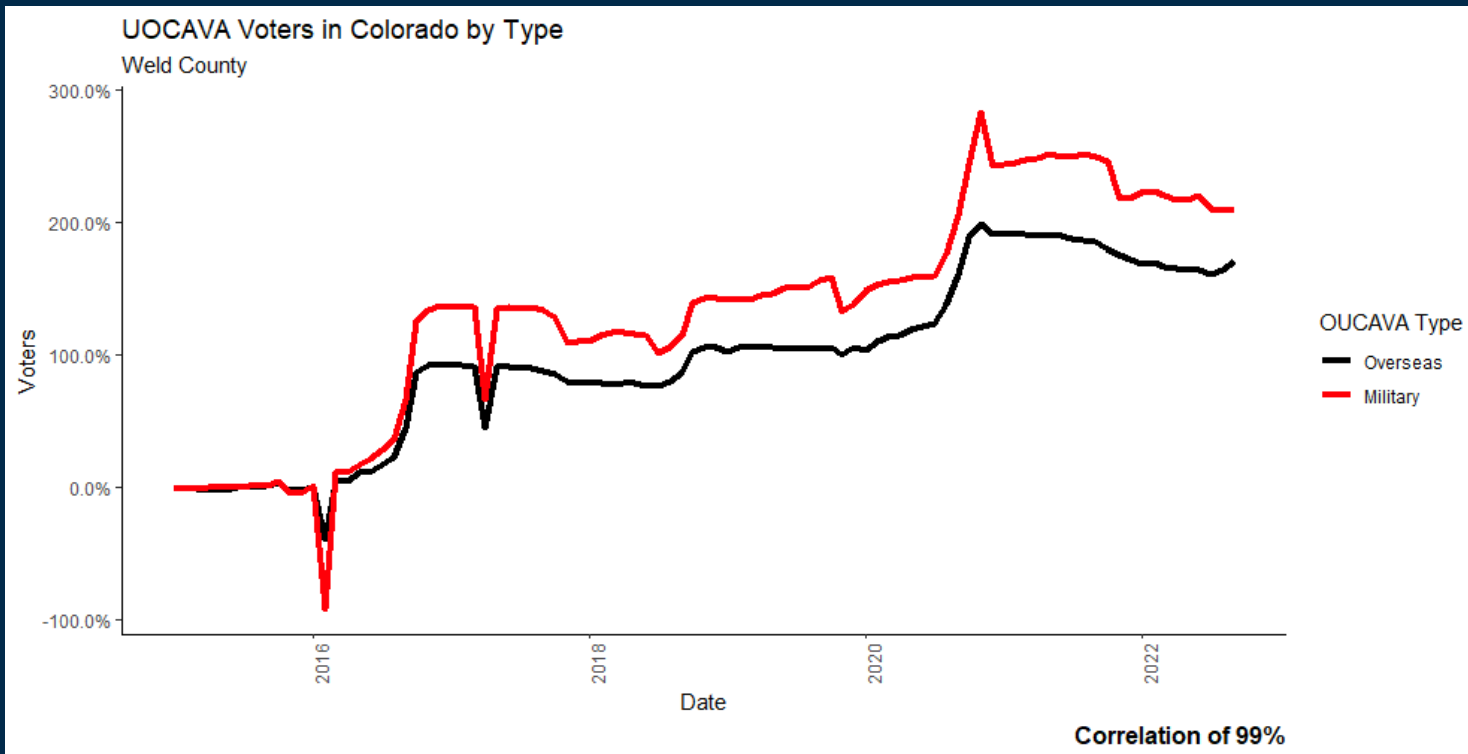

UOCAVA Voters Larimer County

Key Takeaways

- Substantial overseas and military voter decline in early 2016 that was built back up in time for the 2018 general election
- Substantial military & overseas voter growth right before the 2020 general election, but then removed after
- High correlation suggests that overseas voters may be cloned from military voters

UOCAVA Voters Weld County

Key Takeaways

- Substantial overseas voter decline in early 2016 that was built back up in time for the 2018 general election
- Substantial military & overseas voter growth right before the 2020 general election, but then removed after
- High correlation suggests that overseas voters may be cloned from military voters
