

Votrite

Problems we are solving:

Environmental Issues

Ballot Waste

Voter Participation

Security Issues

How our product/service is solving the problems

Environmental Issue is about the destruction of trees to produce paper ballots. Papermaking has an impact on the environment because it destroys trees in the process. According to data from the Global Forest Resource Assessment roughly 80,000 to 160,000 trees are cut down each day around the world with a significant percentage being used in the paper industry.

It will take the destruction of one tree for each 8,000 paper ballots (Quora)

The life cycle of paper is damaging to the environment from beginning to end. ... When paper rots, it emits methane, a greenhouse gas.

Ballot Waste: The cost of a scanner ballot is approximately \$0.29 each versus Votrite paper ballot at \$0.03. The printing of scanner ballots is estimated for voter consumption. Millions of ballots are thrown away at a cost of \$0.29 each (taxpayer \$\$\$) in every election, because it's impossible to decide how ballots are needed for each election, while Votrite prints the ballot as requested by the Administrator or Voter @ \$0.03 each.

Votrite paper is phenol-free thermal paper. Those who work every day with thermal paper can have long-term BPA exposure which has been linked to several health conditions, such as prostate and breast cancer.

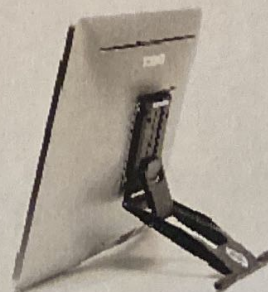

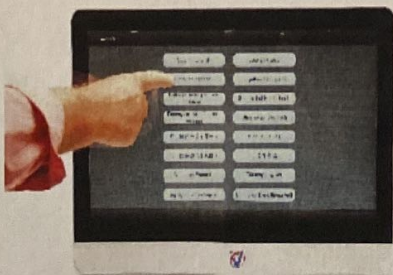

Voter Participation: Scanner ballot and paper ballots used to vote may have two sides with two languages versus Votrite which come in any language as shown in languages ballot folder.

Security Issues: Vote is never connected to the internet. Each voting machine has its own data base folder and operating program with redundant memory features. Votrite's fully encrypted program with other features deters access from hackers and malicious viruses.

VOTRITE VOTING REVOLUTIONIZED

Our 21st Century **Vision for Voting**

HACKING

Our limited access to penetrate our software with individual databases prevents hacking.

WASTE

We eliminate the expensive costs of printing paper ballots and do our part in saving the trees. Hundreds of millions of paper ballots are thrown away after an election.

NATIONWIDE

Our private sectors software automates and enhances the voting process for all membership organizations mandated to hold an election.

Global

Our secure mobile cloud based online voting system. Visit the Apple App Store or Google Play and download our voting APP. Votrite or go to (<http://www.votritemobil.com>)
