Built for Integrity

How to make American elections transparent and trustworthy

Cause of America

Elections will be trustworthy <u>only</u> when CITIZENS are in control.

1. **Elections *belong* to citizens.**

2. **Integrity *first and above all: Transparency = Truth***

3. **Any law, rule, or act of government that reduces or risks election integrity is *void*.**

4. ***Decentralization is critical* to self-governance.**

5. **Complexity breeds and hides corruption.**

The election system we have is highly flawed.

Centralized, vulnerable, dirty voter rolls

Vulnerable mail-in ballots and relaxed ID

Vulnerable black-box vote counting

Vulnerable vendor-controlled reporting

Vulnerable black-box election audits

No way to verify HOW your vote counted

*Vulnerable to **fake voters, fake ballots, fake counts***

This is not a theory...

AZ Auditors Say Over 17,000 Duplicate Ballots Found in Maricopa County, 1.5 Times What Biden Won By

By Michael Austin• September 24, 2021 at 2:49pm

4

The election system we need prioritizes integrity.

| Component	Prevents		
	Fake Voters	Fake Ballots	Fake Counts
Start over: Local-controlled, clean voter rolls	☑		
In-person, election DAY voting w/gov. photo ID	☑	☑	
Precinct hand-count of numbered ballots under live-streamed, archived HD video		☑	☑
Precincts certify and report vote count to precinct VOTERS, *then Report certified count to counties*			☑
Counties tally precinct counts ON VIDEO, report certified tally to voters/states			☑
States tally counties' tallies, report/certify to voters			☑

It's time to act.

Who? ➡ What?	Return Control of Registration & Voter Roll Management to the County	End No Excuse Mail-In Voting & Return to a Secure Absentee Process	Eliminate Electronic Voting Machines; Require Hand Count at the Precinct Level	Require In-Person Registration & Voting, Requiring Photo ID
Citizens	a. Pressure Your Elected Officials b. Bring Suit c. Recall Resisters	a. Pressure Legislators b. Bring Suit c. Recall Resisters	a. Pressure Commissioners b. Recall Resisters c. Volunteer to Hand Count	a. Pressure Elected Officials b. Bring Suit c. Recall Resisters
Boards of County Commissioners	a. Pressure Legislators b. Bring Suit	a. Pressure Legislators b. Bring Suit	a. Vote to Defund/Eliminate the Machines b. Direct Hand Count c. Decouple Local Elections	a. Pressure Legislators b. Bring Suit
Legislators	a. Modify Statutes b. Direct Audit of Elections, Systems	a. Modify Statutes b. Direct Audit of Elections, Systems	a. Modify Statutes b. Direct Audit of Elections, Systems	a. Modify Statutes b. Direct Audit of Elections, Systems
Prosecutors /Courts	a. Investigate Evidence of Criminal Violations b. Hear Evidence and Rule for Integrity	a. Investigate Evidence of Criminal Violations b. Hear Evidence and Rule for Integrity	None.	a. Investigate Evidence of Criminal Violations b. Hear Evidence and Rule for Integrity

CHAPTER 3
THE SCORE SYSTEM AND IT CONTROLS

During our audit work, we identified certain matters that are not included in this audit report that were reported in a separate confidential report dated November 2015.

In the summer of 2020, soon after red team researchers from a managed network of ethical hackers began examining the State of Colorado's voter registration website for potential vulnerabilities, they spotted something alarming. Problems with the website's CAPTCHA challenge, a common first line of defense online, could have opened up the site to a distributed

In total, the red team network discovered seven vulnerabilities in Colorado's election-related systems as well as the Secretary of State's official website. Colorado patched all of them well ahead of Election Day using the detailed reports they received in real time from the provider's Crowdsourced Security Platform.

The integrity of mail-in ballots relies on signature verification.

What Election Judges Actually See

The issues with Black Box Voting Machines have been known – and remain unresolved.

- **Bev Harris, Black Box Voting, 2004:**

  "With computerized voting, the certified and sworn officials step aside and let technicians, and sometimes the county computer guy, tell us the election results."

- **Gould report, Mesa County, September 2021 (like Antrim/Maricopa):**

  "(CRS) 1-5-601.5 requires…compliance with…2002 Voting System Standards…this forensic examination found that a substantially large number of these requirements have not been met."

- **Halderman Declaration, 1:17-CV-2989-AT, Curling v. Raffensberger:**

  "My July 1, 2021, expert report describes…flaws that would allow attackers to install malicious software on the ICX,…with temporary physical access…or remotely from (EMS)…Nor do these problems affect (GA) alone…It will be used for accessible voting in…Colorado"
