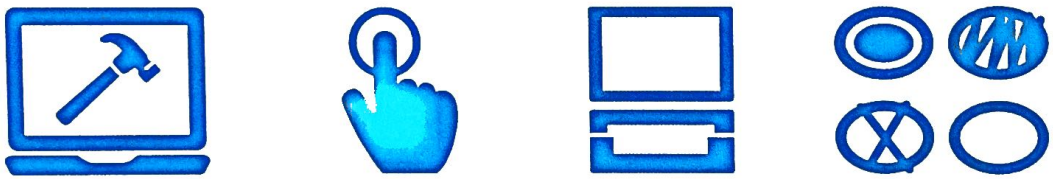
Election Solutions



Clear Ballot™

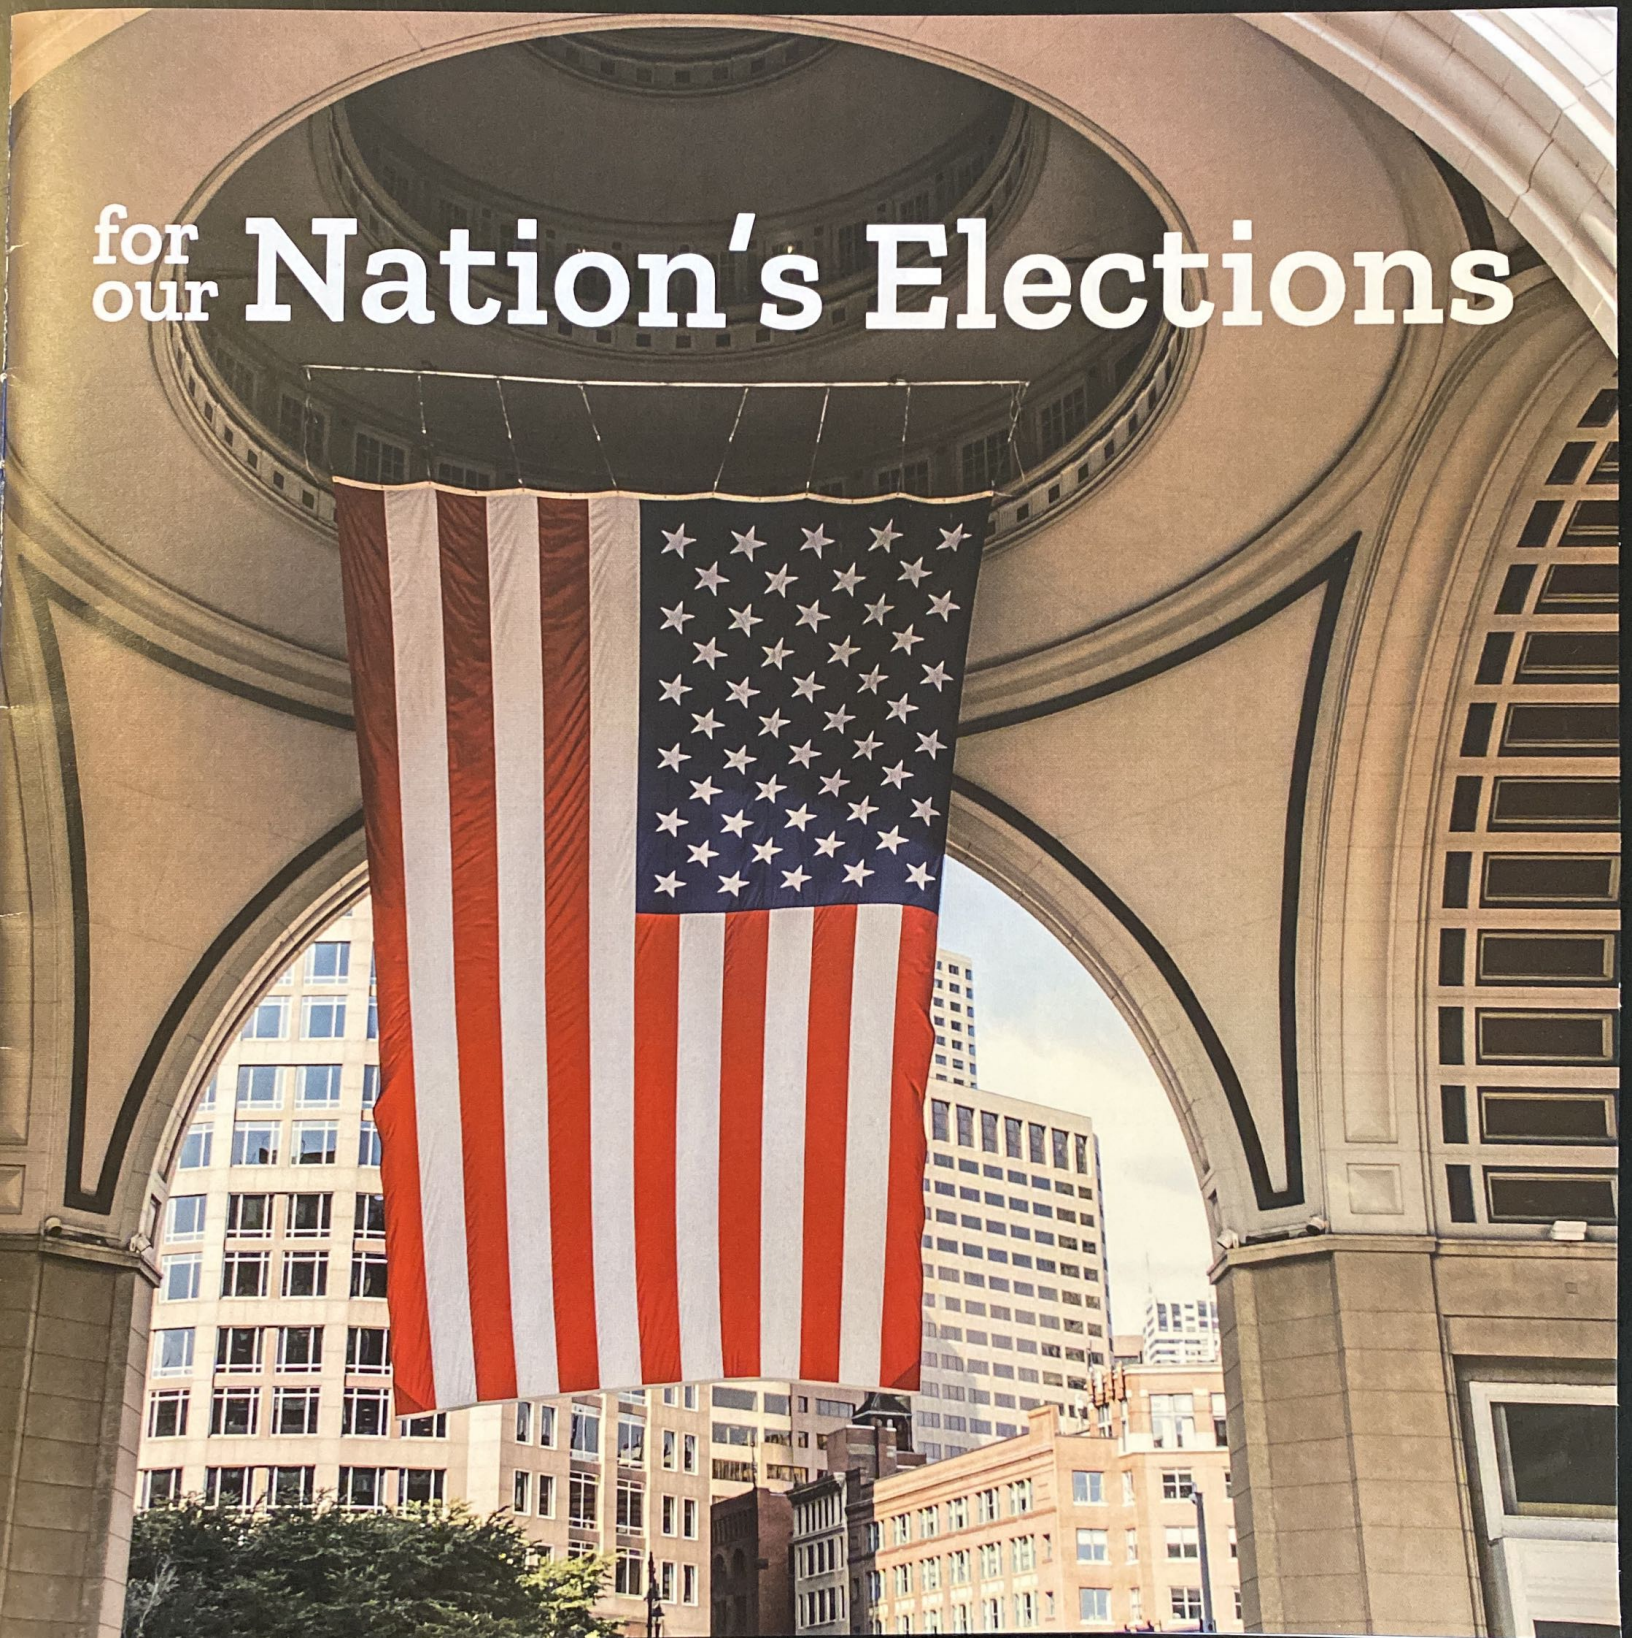
Innovation

Clear Ballot offers a superior product in every regard. As the world of elections evolves, we want Clear Ballot at our side.

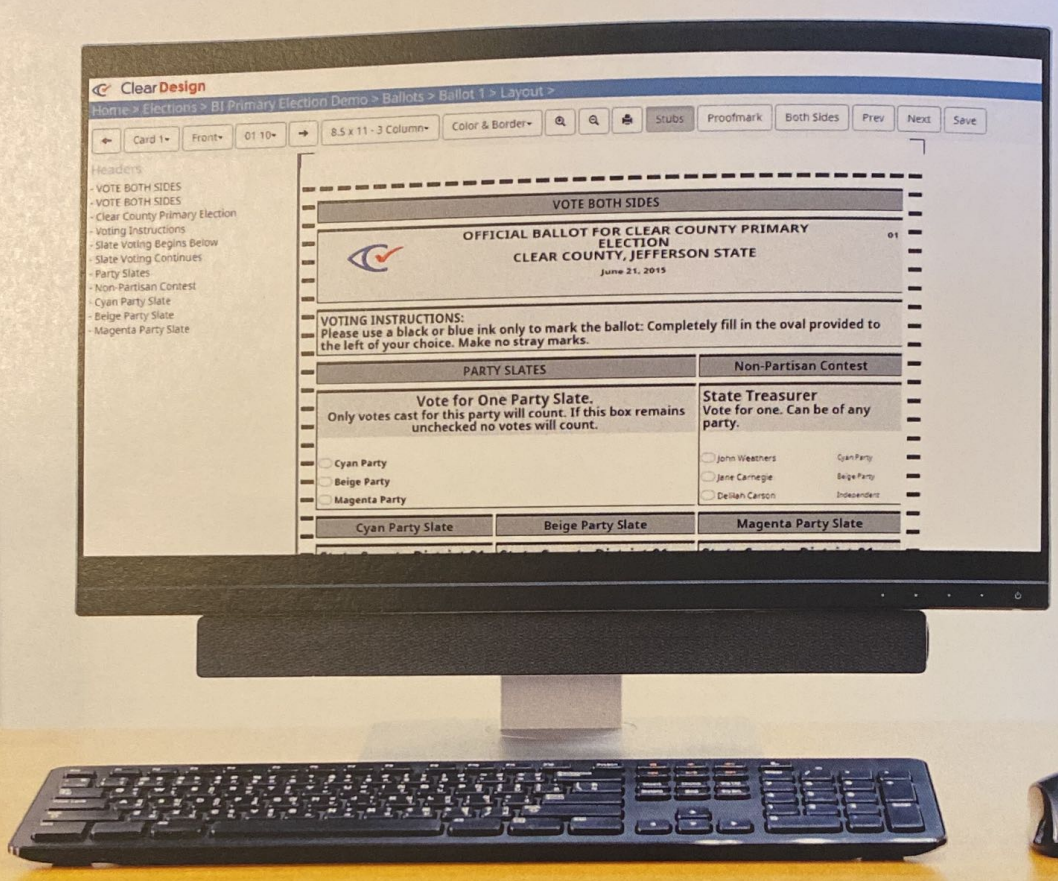
Julie Anderson, Auditor
Pierce County, WA

Clear Ballot Group has the most modern, secure, and auditable voting solutions in the industry. Our technology and software, based on the hand-marked paper ballot, has brought new levels of speed, accuracy, and transparency to elections. Introducing never-previously-available data, new verification methods, and increased accuracy, Clear Ballot provides confidence that every ballot is counted correctly.

Our products' superior performance and our commitment to continual innovation launched Clear Ballot's evolution from a small election-auditing company to the fourth largest vote-tabulation company in just over a decade. Looking forward, Clear Ballot aims to convert transparency of results into voter confidence and strengthen the democratic process nationwide.



for our Nation's Elections



Flexible, customizable ballot design

Programming knowledge not required

Familiar formatting tools

> Uploading the election data took only minutes. Programming time was cut in half. Talk about peace of mind!

Jon Dolson, County Clerk
Sheboygan County, WI

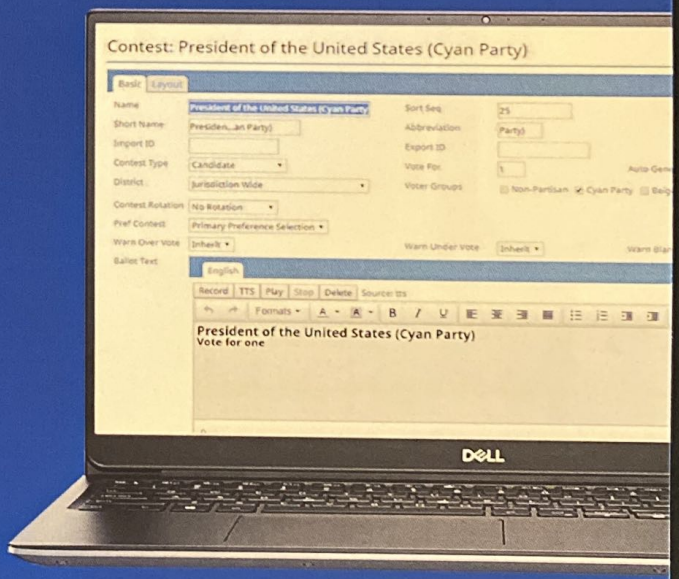
Programming Your Election

ClearDesign® enables election officials to design ballots quickly with easy-to-use browser navigation and familiar formatting tools. It also offers significant cost savings:

Allows one set of ballot proofing for all ballots

Enables flexibility in ballot printing and paper type

Automatically generates ballot sets to meet the needs of all voters



In-Person Solutions

The ClearVote® in-person voting system was designed to be the most auditable, efficient, and transparent voting system on the market today.

ClearAccess

Uses the Anywhere Ballot, tested to find the best color, text size, instructions, and interface response for disabled voters

Produces a full-size paper ballot identical to printed absentee or UOCAVA ballots

Fully ADA and HAVA compliant

ClearVote includes ClearCast Go, Clear Ballot's precinct scanner, and ClearAccess, which exceeds accessibility requirements. These in-person solutions are fully integrated with our advanced software for ballot design, vote visualization, and results reporting.

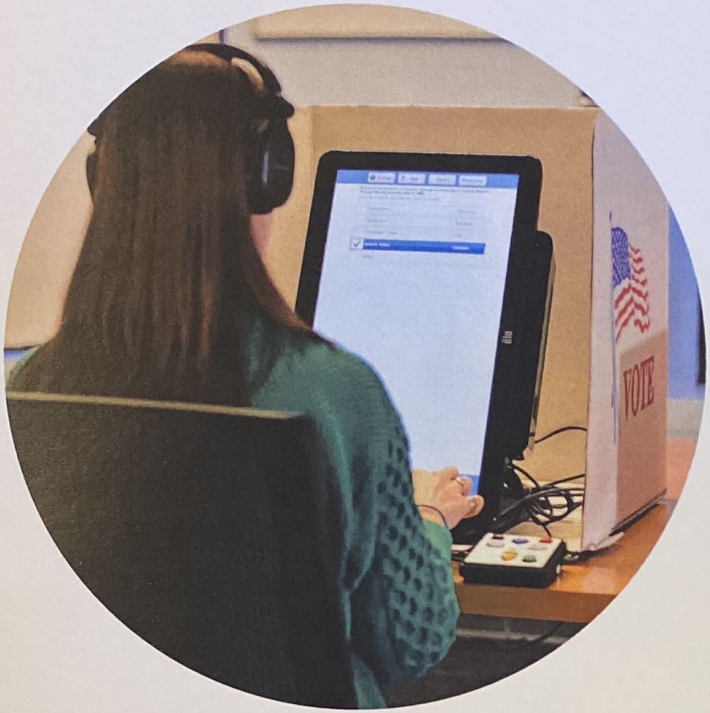
ClearCast Go

- Durable, reliable performance
- Collapsible ballot box for easy storage
- Rugged hardware meets high-tech software
- Heavy-duty ballot box for transporting materials

Benefits for All

The ClearVote in-person voting system was designed with both the poll worker and voter experiences in mind. Open and close the polls in under two minutes each, with modern technology and simple on-screen prompts.

- Intuitive use for poll workers and voters
- Open and close polls in under two minutes
- Helps maintain shorter lines at polling places



Easy to prepare and break down voting station with setup case

Allows disabled voters to mark ballots independently

Offers multiple devices for ballot navigation and vote selection

- Scalable for any jurisdiction size
- High-speed tabulation and real-time reporting
- No sorting, duplicating, or outstacking
- Digital ballot review for close contests

Central Count & Absentee

We're vote-by-mail and absentee experts. Just ask our customers in vote-by-mail states Washington and Oregon, where we serve 70% of the markets. We've built best practices to help your jurisdiction process high numbers of mail-in and absentee ballots, whether you're small or large, scaling from 2% absentee to 10%, or 50% to 90%.

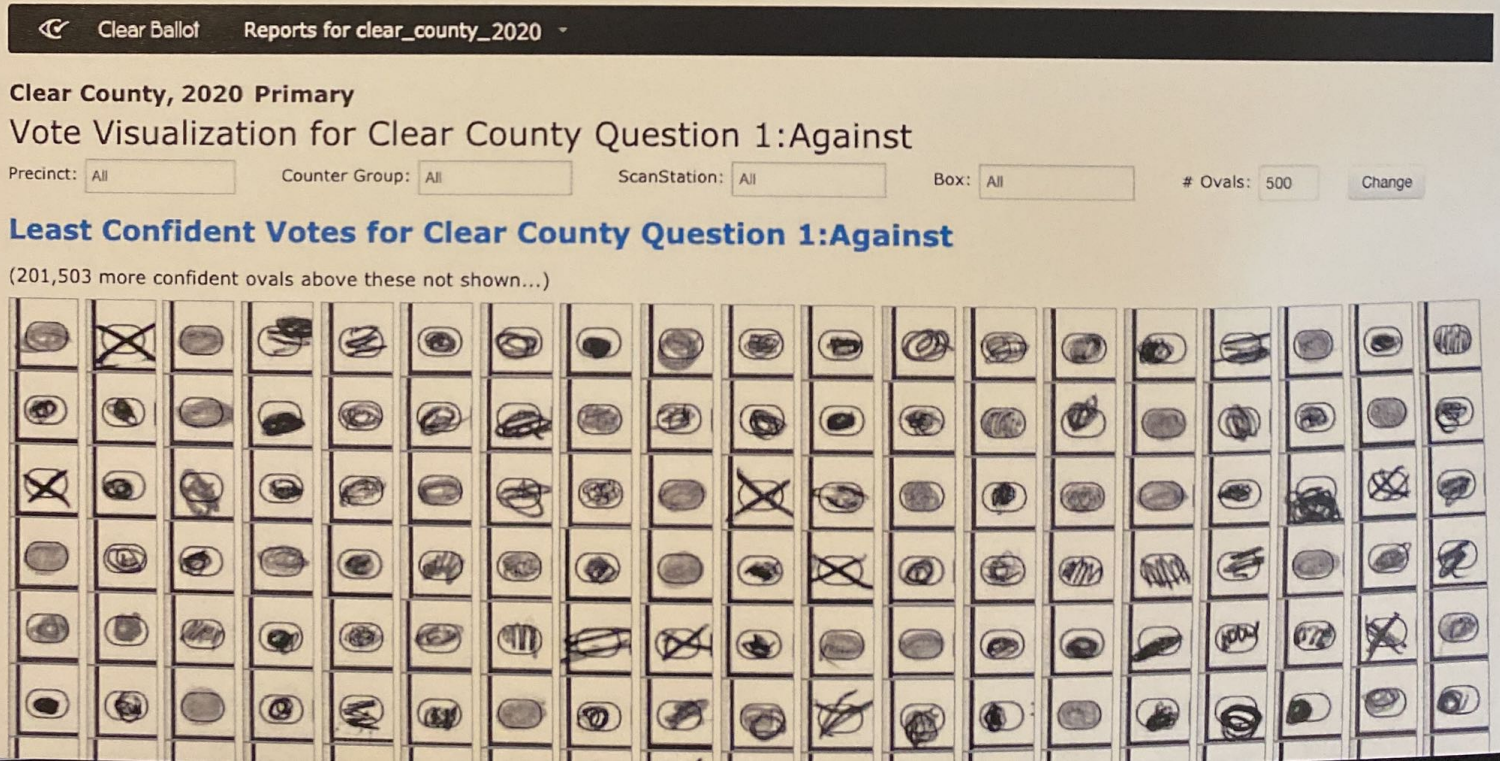
Clear Ballot's innovative ClearCount central scanning system has greatly reduced the time and increased the efficiency of our absentee ballot counting process. It enhances the transparency of the vote counting process by allowing observers to clearly see ballots with questionable votes or markings.

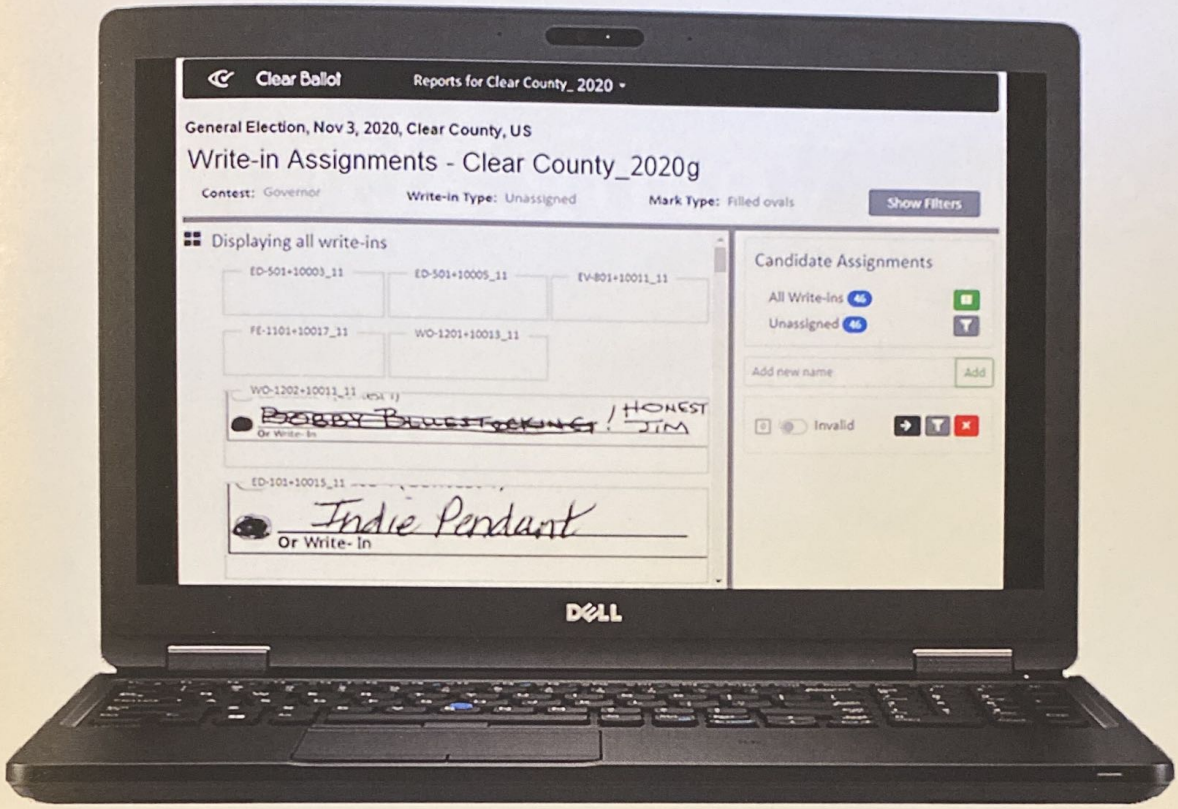
Mary R. Dyer & Gregory B. Campbell
Election Commissioners
Clinton County, New York

Visualization & Reporting

> The Clear Ballot vote visualization tool provides unmatched transparency that is essential to election administration.
>
> *Tim Scott, Election Director*
> *Multnomah County, OR*

Clear Ballot offers the first solution to capture every vote with high resolution ballot images, offering a new level of transparency to jurisdictions. By analyzing every mark, both inside and around the vote target, vote visualization ensures every vote is counted as intended. The system saves hours of time and minimizes human error, through user-based security that captures every edit.





Unprecedented vote visualization technology

Enhanced transparency for strong voter confidence

Cutting-edge digital insight into overvotes, write-ins, and unreadable ballots

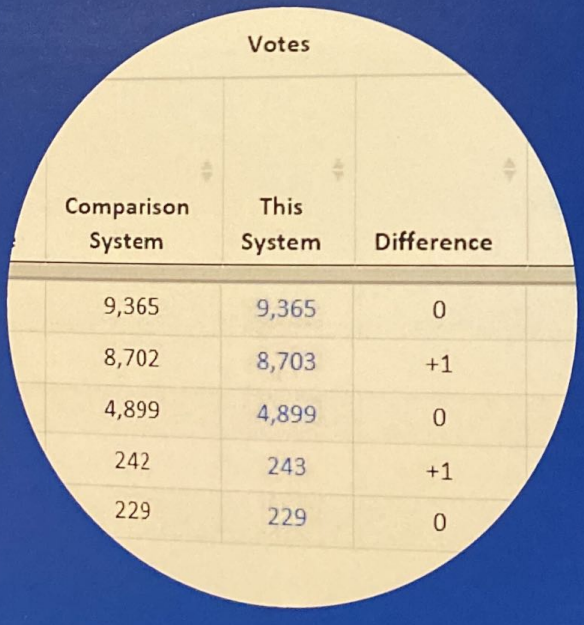
Easy, secure adjudication process, eliminating the need to remake ballots

Results Verification

> Clear Ballot gives absolute comfort by providing an independent validation of election results and a digital inventory that no other system provides. Clear Ballot allowed us to become more efficient and cost-effective.
>
> *Mark Andersen, Supervisor of Elections*
> *Bay County, Florida*

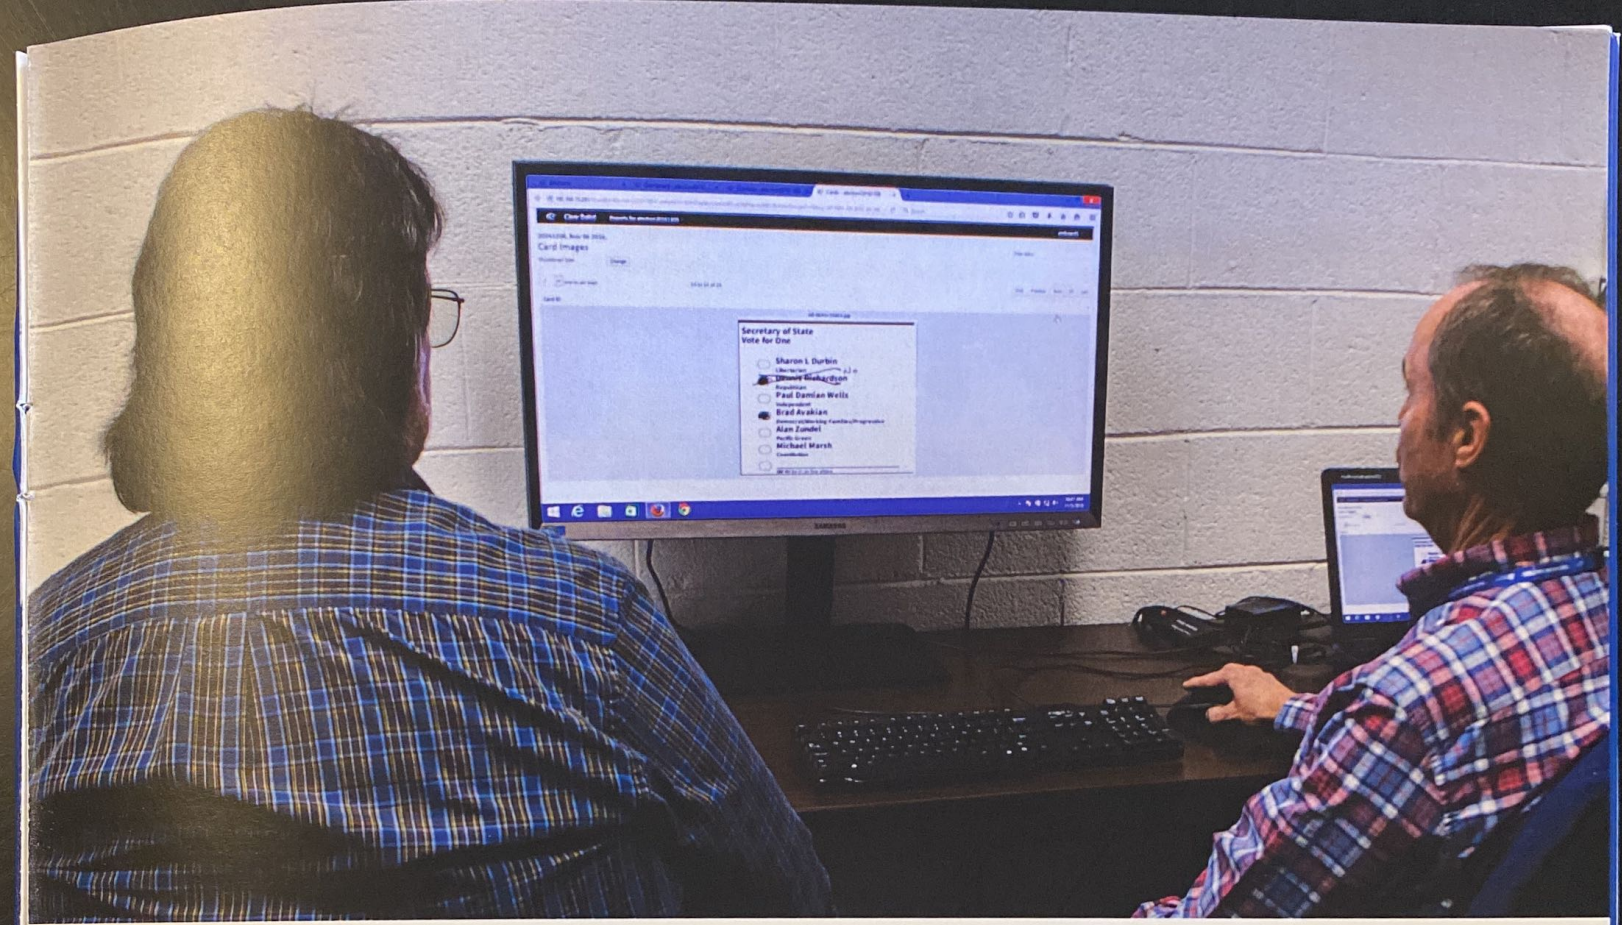
Clear Ballot offers the only independent digital post-election solution with a comprehensive comparison of results. Our results verification technology can be used to audit a percentage or portion of ballots, or 100% of ballots in a state or county.

The system improves processes and increases confidence in elections while meeting the specific needs of your jurisdiction. Clear Ballot software provides unprecedented visibility into results.



Votes

Comparison System	This System	Difference
9,365	9,365	0
8,702	8,703	+1
4,899	4,899	0
242	243	+1
229	229	0



Exclusive ability to read all other voting systems' ballots

Option to import ballot images or rescan physical ballots

Adapts to perform different types of audits

Audits in-house processes
