

Professional | Scalable | Budget Friendly
Smarter Document Capture

CROSSCAP is a highly flexible, easy to use, all-in-one capture solution for any production scanning environment. Available in low-to-high volumes, standalone versions or as a multi-server enterprise solution, CROSSCAP provides a powerful solution that grows with your needs as a single or multi-user solution. CROSSCAP supports all TWAIN scanners and can be easily integrated into existing systems with robust capabilities for image processing, text and barcode recognition (1-D and 2-D), as well as batch-oriented processing of documents. CROSSCAP offers limitless scanning capabilities without click charges that can fit any budget

SIMPLE | Operation And Configuration
VERSATILE | In A Multitude Of Applications
EFFECTIVE | Productivity From The Start

No Production Limits
No Click Charges
All TWAIN Driver Compatible
1-D/2-D Barcode and Patchcodes
OCR / ICR
Free Definable Output
Database Matching
XML Generation
Multi-stream
PDF/A High Compression
Digital Signature
Direct Email Transfer

CROSSCAP, the perfect document capture solution for any industry.

CROSSCAP includes a full suite of features and functionalities to optimize document quality and increase speed of critical processes.

Ergonomic and Easy To Use

Intuitive user interface, inspired by MSOffice.

Enable or disable functions, menu commands and user rights for specific users.

Up to 8 sheet view elements, data tree and thumbnail view for maximum quality control.

Diverse language support.

Index and Output Formats

Automatically generate index values in the project, document and page levels. Available index formats: XML, CSV, Text, Signal files

Available output Formats: TIFF (Raw, G4), JPG, JBIG, JPEG2000, PDF/A and many more.

Scan, Edit Capture

Compatible with all TWAIN-driver scanners.

Quickly switch between any two attached document, wide-format or book scanners.

Document separation via page counter, OCR, barcodes, patchcodes, blank pages or manual.

Digital Signature

Simple, qualified, configurable signature via DigiSeal Office Pro Module.

Quickly sign stacks of up to 500 documents.

Batch Processing and Export

Built-in process manager automates your daily work in controlled background processes.

Free configurable index and OCR text files.

Export directly into existing DMS/ECM systems.

Customize to finalization process during scan, idle time or specific hours (overnight).

Parallel export of various formats and data.

Export directly to multiple destinations.

Barcode and OCR

Feature both 1-D and 2-D barcode recognition.

Full-page or user defined Zonal Barcode Recognition.

Tesseract OCR Included, ABBY FineReader API available. Both Zonal or Full-text configurable.

Create multiple recognition areas to specific index values.

Projects

No-limit scan profile and project support.

Optional expert-mode allows users to create complex, specialized scan and output profiles.

Rapid import/export of saved scan profiles.

Up to 10 Project-specific scanner settings.
