Voting Systems

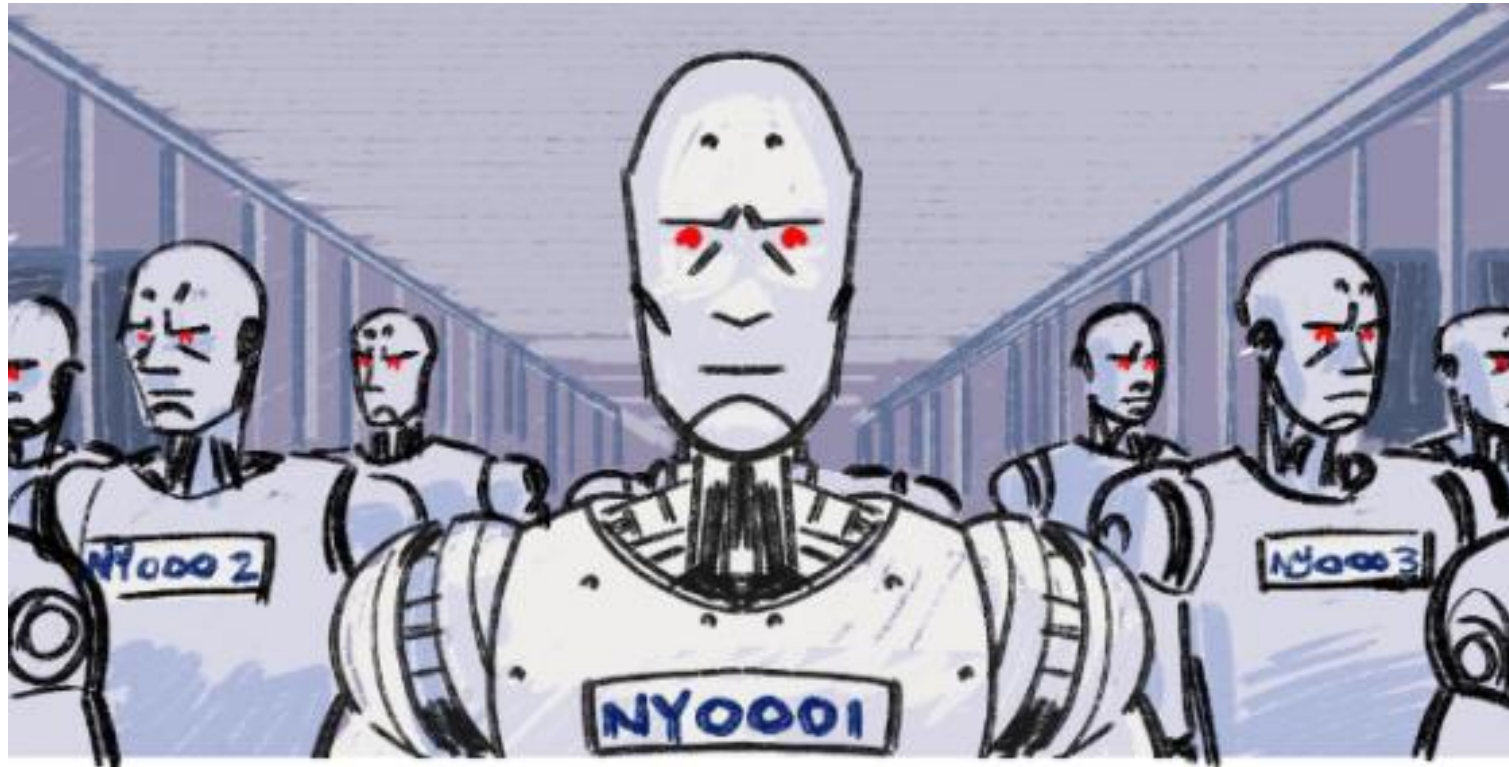

Dominion Voting System

ES&S

- Vulnerability: Portable Memory Device housed where the paper tape rolls are located and changed. Seal has to be broken.
- Most of the Blank Addresses from our voter rolls are in less populated counties using the ES&S machine

Attack of the Clones: ~~Weaponized Voter Rolls in New York~~

The **MOMENT**
OF TRUTH
August 20th & 21st Summit

HOSTED BY
MIKE LINDELL

We are being governed by people WE DID NOT ELECT

- In 38% of the NYS Senators and Assembly Members races and 41% of our US Congressional Representatives races the number of invalid and illegal registrations with votes assigned to them OUTSTRIPS their margin of victory in 2020
- 32% of the NYS Assembly, 21% of the Senate, and 4% of the Representation in Congress ran unopposed by the Republican Party

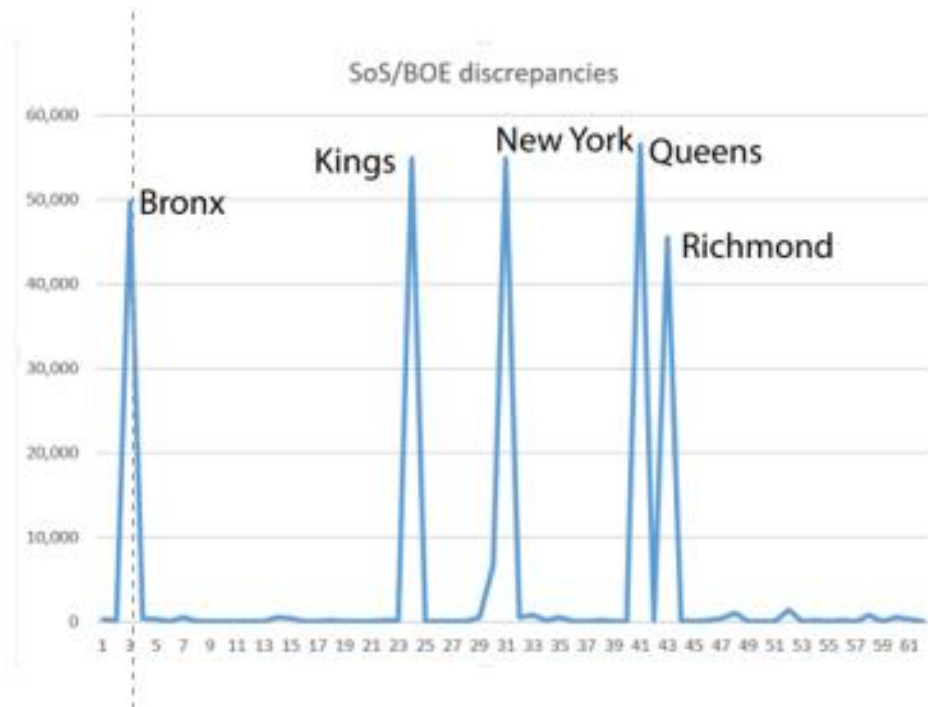

Data Received from 4 Official Sources *some* obtained through Freedom of Information Law (FOIL) Requests

1. State Board of Elections
2. Secretary of State
3. Precincts
4. Some Counties (not all counties
have complied with FOIL Requests)

Official Counts from the Sources Don't Agree:

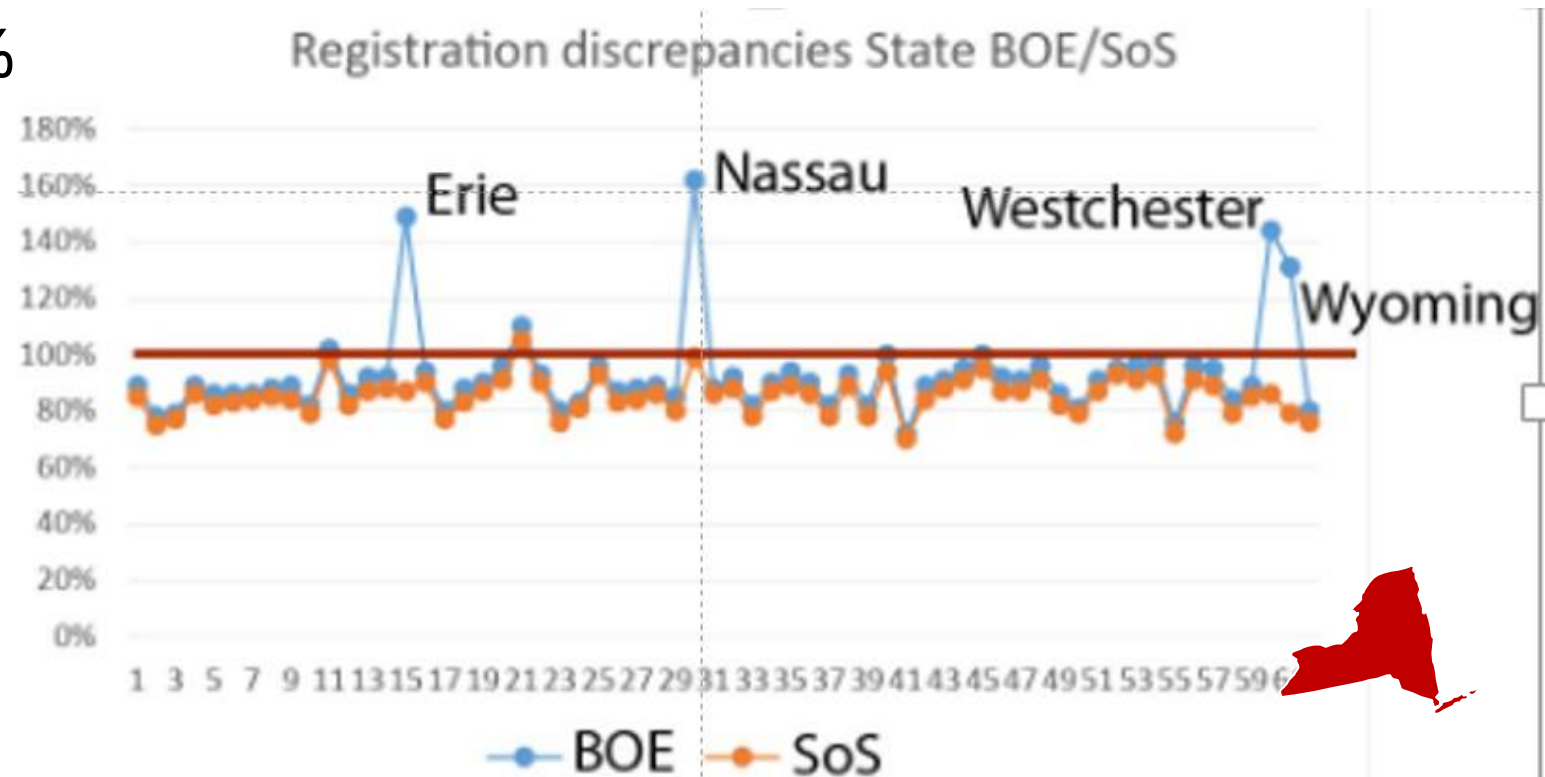

- The greatest discrepancy was between the Secretary of State and Board of Elections: 334,615 votes
- The biggest vote count discrepancies (82.8%) are in the 5 boroughs of NYC

High Voter Registration:

- More people registered to vote than are eligible to vote
- 6 NY Counties had in excess of 100% voter Registrations.
(4 are labeled)
- 24 Counties between 90-100%

At least 2.3 million registrations in question in NYS

Additional Registrations in Question	
Excess Voter ID #s	321,000+
Missing Voter Records (7 counties)	1,899,730
Missing Votes (5 counties)	223,640
Irreconcilable Official Counts	334,615
Blank Addresses	138,121
Total Registrations in Question	2,346,691*

*total votes in question includes confirmed non-overlapping categories only

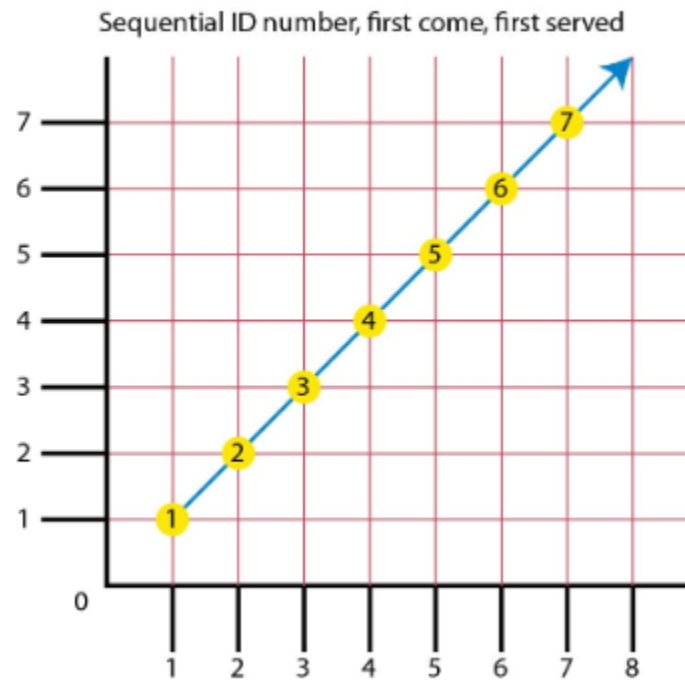

To create fake votes, fake voters are needed

OVER REGISTRATION VIA CLONED 'DNA': YOURS

Logical Innocent Serial Numbers Assignment

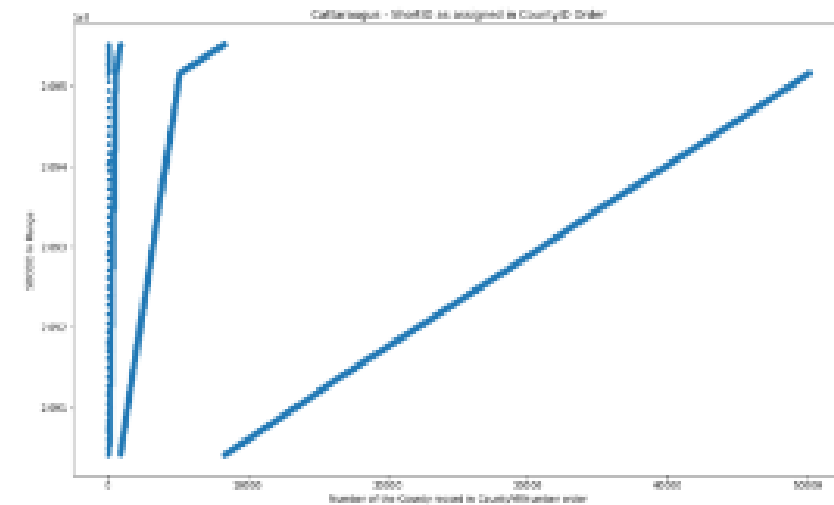

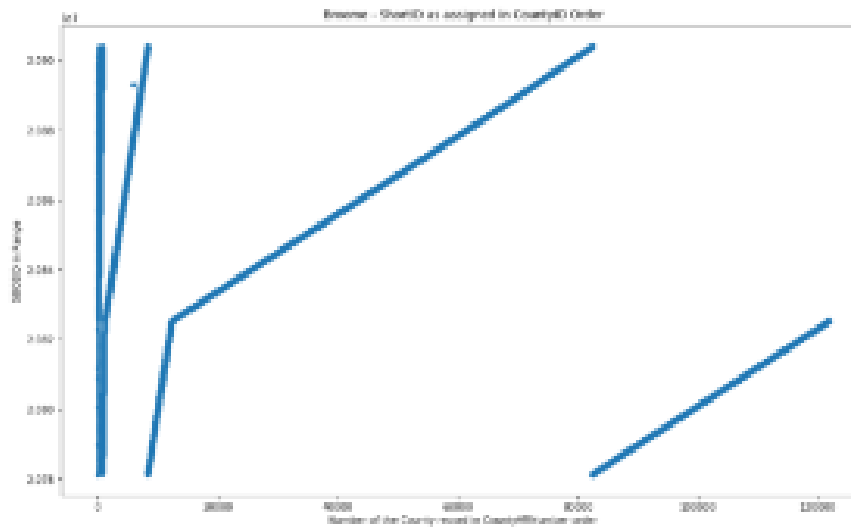

- 45 degree slope
- Like getting a number at the Deli Counter in the Grocery Store
- First number has a value of 1, second number has a value of 2, third: 3

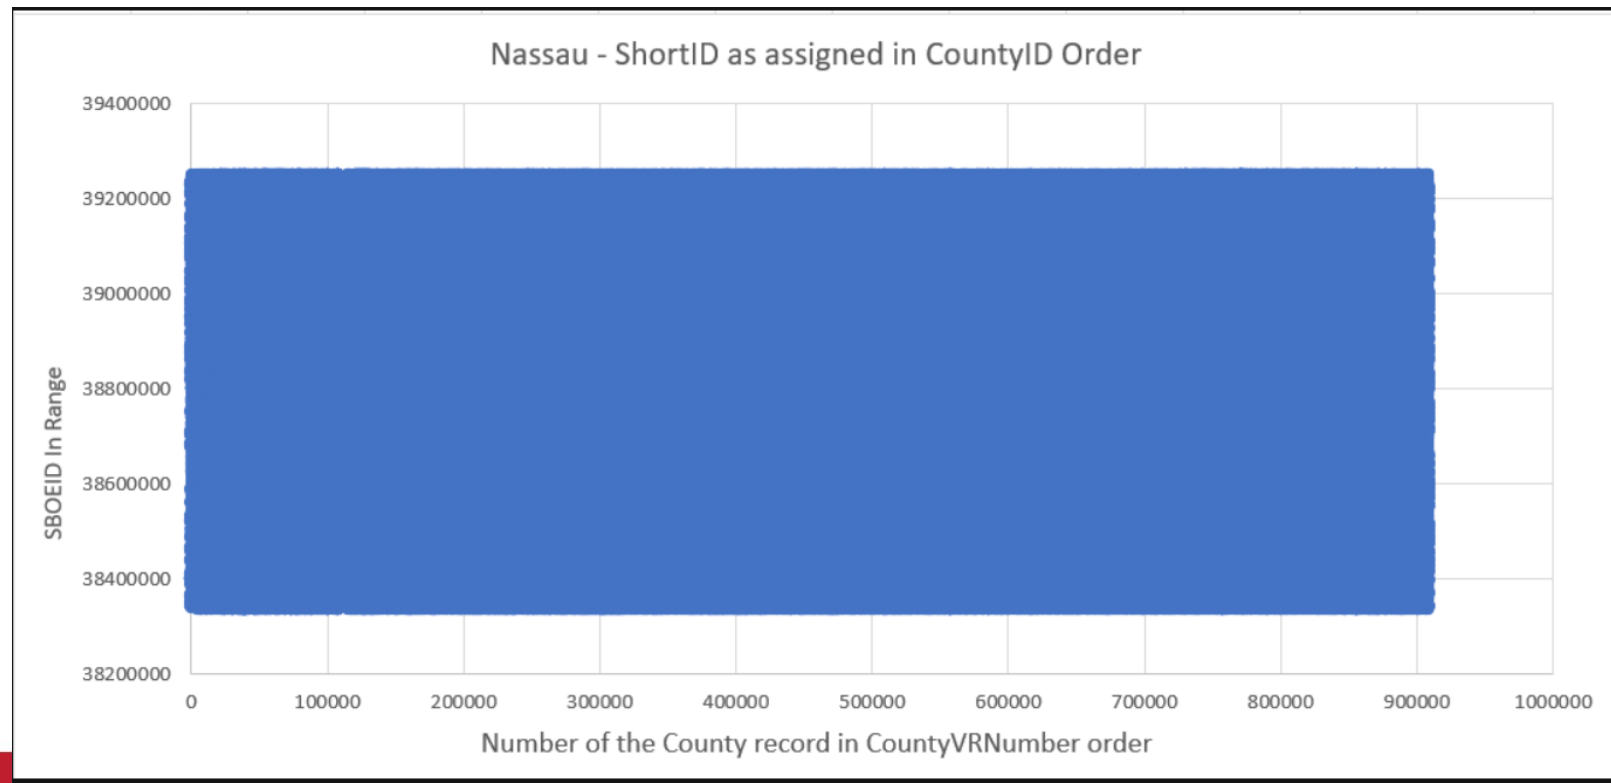

Broome and Cattaraugus Counties

Not Logical or Innocent

Scatter Plot of Assigned SBOEID and CID's

Nassau SBOEID numbers - The Metronome- not logical or innocent

Cloned Voters

- One of several methods used to load falsified registrations into voter rolls
- Algorithmically-modified names
- Not Organic

Anonymized Examples

Stolen Identity = Stolen Election

- The Citizens of NY who were cloned are victims of Identity Theft
- Cloned Registration = 3 Felonies
- Many of the Cloned Registrations VOTED in multiple Elections
- Cloned Registration which Voted = 3 more Felonies
- 1 million felonies...and counting

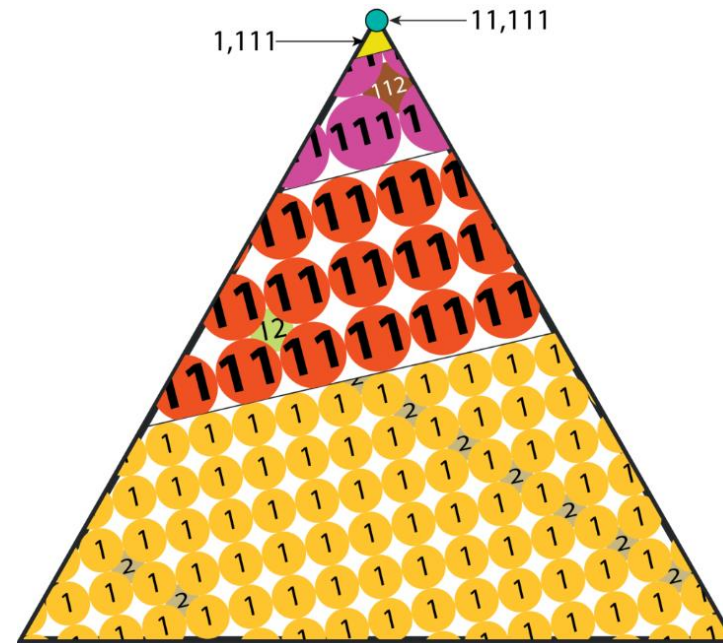

How did they keep track of and find the Falsified Registrations so they could assign votes to them???

- randomly dispersed registrations
- 20 million records in NYS
- millions of which are legitimate registrations

The Voter Matrix

- Deliberately obscured and concealed pattern in the NY Voter Rolls
- Buried under 6 Layers of Code
- Algorithmically Produced
- Repositions voter ID numbers in such a way that they function similarly to marked cards
- Structured method to differentiate between innocent registrations and falsified registrations.
- Allows an external specially designed software to interact with the data base
- Pattern based On Rep Units : 11, 111,1111

4 Voter Matrices Have Been Found in NY In Every County

Spiral (52 counties)

- The example used in this presentation

Reverse Spiral (5 counties)

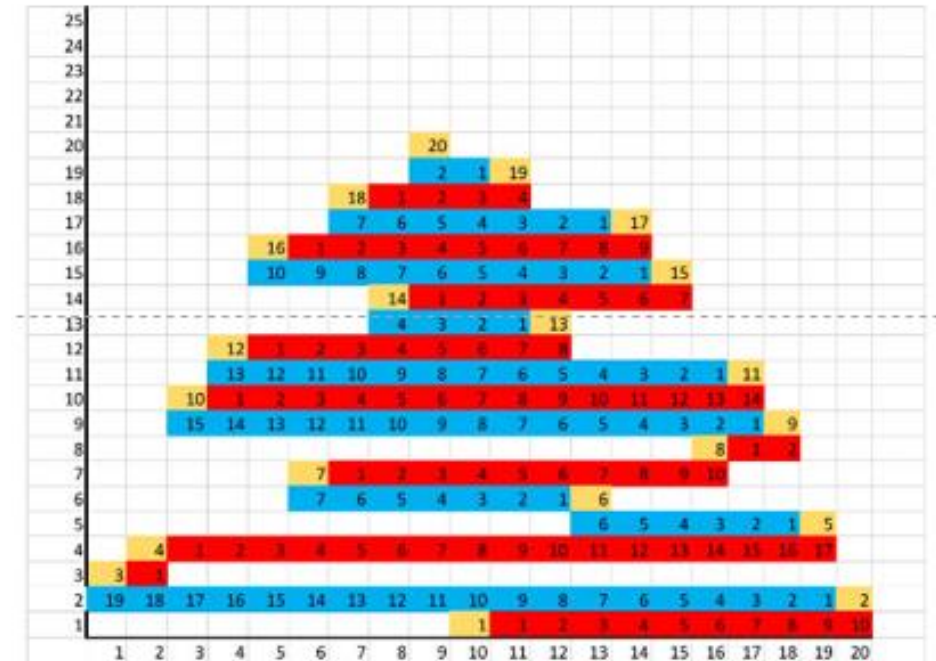

- same as spiral but sorted backwards

Metronome (4 counties)

- Pachinko algorithm

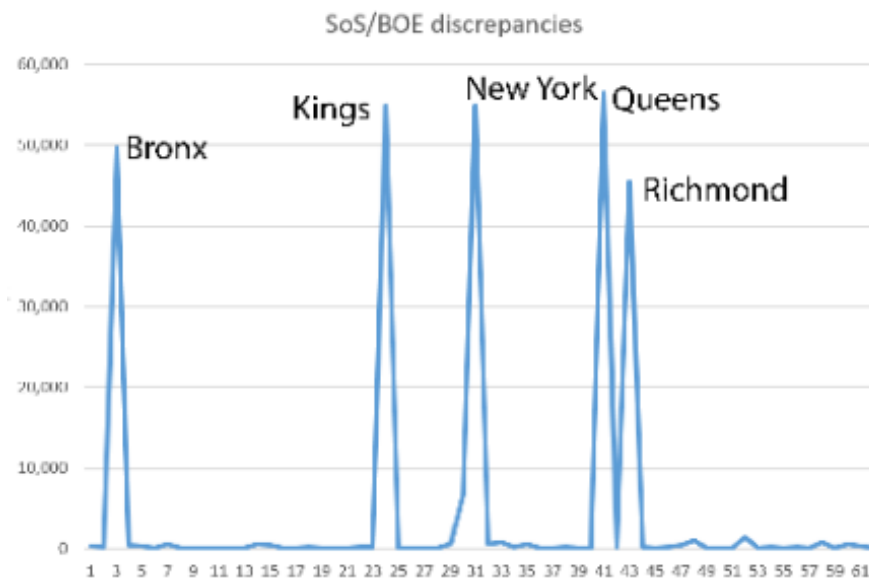

Blur (1 county)

- similar to spiral

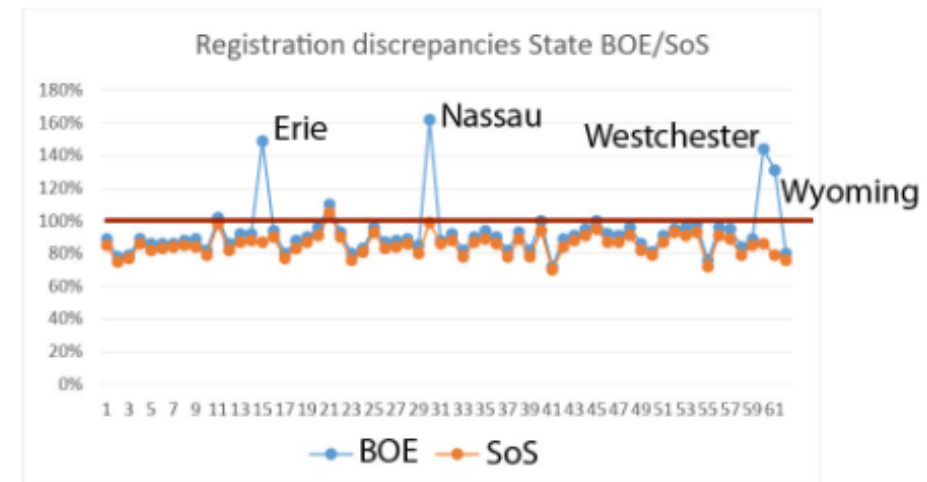

Reverse Spiral and Metronome counties were grouped prior to discovery of the matrix

Reverse Spiral counties have greater vote count discrepancies than any other counties

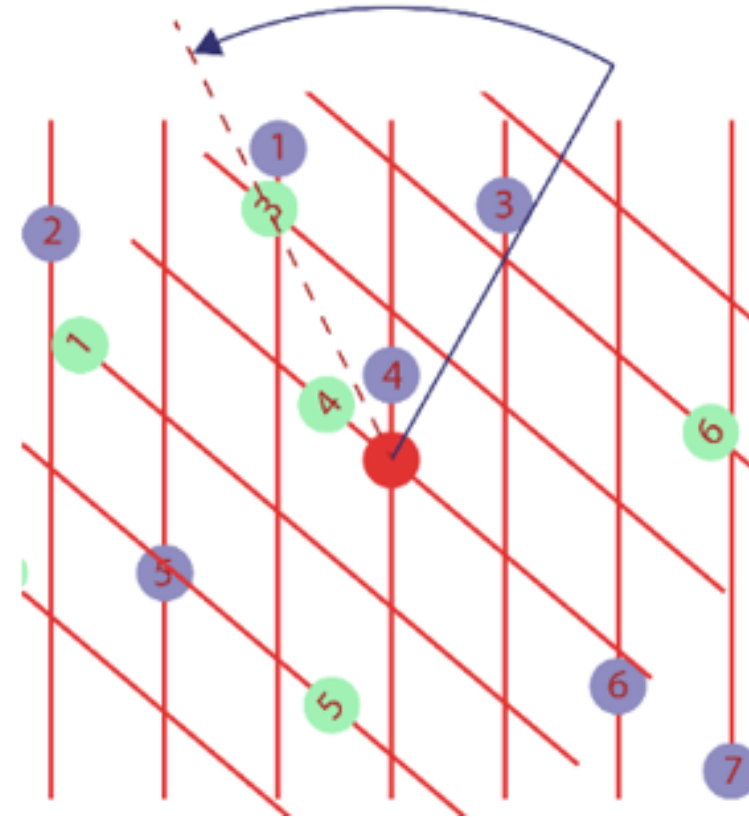

Metronome counties have higher voter registration than any other counties
