End of service statement

Summary

This version of Windows 10 has reached end of service. Devices running the following versions of Windows 10 will no longer receive monthly security and quality updates that contain protection from the latest security threats. To continue receiving security and quality updates, Microsoft recommends upgrading to the latest version of Windows 11. To learn if your computer can be upgraded to Windows 11, see Can I upgrade to Windows 11? Also see Download Windows 11.

Windows 10 versions that have reached end of service:

- Windows 10, version 1507 (RTM)

- Windows 10 2015 LTSB

- Windows 10, version 1511

- Windows 10, version 1607

- Windows 10, version 1703

- Windows 10, version 1709

- Windows 10, version 1803

- Windows 10, version 1809

- Windows 10, version 1903

- Windows 10, version 1909

- Windows 10, version 2004

- Windows 10, version 20H2

- Windows 10, version 21H1

❤ Thank you for your feedback! ✕

You can enroll your personal Windows 10 PC in the Extended Security Updates (ESU) program and receive critical monthly security updates after servicing ends. See Windows 10 Consumer Extended Security Updates (ESU) program for detailed information on the ESU program for personal devices.

For instructions on how to enable the ESU keys in commercial environments, see Enable Extended Security Updates (ESU).

For more information on the Windows 10 lifecycle please visit the Microsoft Lifecycle Policy page or the Windows 10 release information page.
